**QUESTION 1**

What procedure should be used to acquire the HMC remote access code?

- A. rcp client code from /hmc/client on the HMC to the client
- B. copy remote_client code to diskette on HMC and copy to client
- C. Open a browser window from the client ftp:///hmc/client download code from HMC
- D. Open a browser window from client http:///remote_client.html download code from HMC

Correct Answer: D

QUESTION 2

Which of the following is a requirement for NIM server installations?

- A. A NIM master must be defined as the first partition of all POWER4 LPAR systems so that subsequent NIM installations can be performed.
- B. The NIM server can be used to install Linux and AIX images, as long as the AIX server is at the latest or same level for the partitions being installed.
- C. The NIM master can be either on a local partition or on another pSeries server, as long as AIX is at the latest or same level for the partitions being installed.
- D. The NIM server can contain AIX 4.3.3 install images, if the AIX image on the NIM server is the most current. Only Red Hat Linux can be used to create a NIM Linux image.

Correct Answer: C

QUESTION 3

A company needs to install their database on a POWER4 pSeries system with 128GB of memory. Which process needs to be used to support this environment?

- A. Install the 32-bit kernel that can run only 32-bit applications.
- B. Install the 32-bit kernel to support 64-bit applications and 32-bit applications.
- C. Install the 64-bit kernel that can only run 64-bit applications.
- D. Install the 64-bit kernel to support 64-bit applications and 32-bit applications.

Correct Answer: D

QUESTION 4

A customer needs to apply a driver update package. What is the recommended method for determining the microcode driver version in an active LPAR from the HMC?

- A. Run Inventory Scout
- B. Select About HMC in the HMC help menu tab
- C. Issue the lscod command
- D. Issue the lscfg -u command

Correct Answer: A

QUESTION 5

Which of the following methods can be used to identify which CPUs have been allocated to particular running partitions?

- A. Run the lsdev -Cc processor command from the AIX command line in this partition.
- B. View the CPU properties for the Managed System from the HMC.
- C. For each processor run the lsattr -El procX command.
- D. Use the bindprocessor -q command.

Correct Answer: B
