**QUESTION 1**

A system administrator has deployed a horizontally and vertically scaled clustered application across a 6-NODE wEBsPHERE Application Server cluster. Each node contains two cluster members. The system administrator is looking for the most scalable HTTP Session persistence mechanism for this environment.

Which of the following HTTP Session persistence strategies would BEST fit these requirements?

- A. Memory-to-Memory Replication in a pure peer-to-peer topology configuration
- B. Database Session persistence
- C. Local Sessions
- D. Local Session with overflow

Correct Answer: B

QUESTION 2

A JDBC provider has been defined at both the cell and node scope. Duplicate datasources have been defined at both levels. An application has defined the same provider and datasource as part of an Enhanced EAR file. Which datasource will be used by the application?

- A. The datasource defined on the JDBC provider at the cell scope.
- B. The datasource defined in the Enhanced EAR file.
- C. The datasource defined at the node scope.
- D. No datasource will be used as the server and will not start when duplicate resources are defined.

Correct Answer: B

QUESTION 3

Which of the follow statements MOST accurately describes the effect of increasing the JVM heap size?

- A. More objects will be created and the time required to garbage collect will decrease.
- B. Applications run longer before a garbage collection occurs.
- C. A larger heap size will cause the server to take loner to start.
- D. No measurable performance change will result from increasing the heap size.

Correct Answer: B

QUESTION 4

A system administrator wants to share system information like Workload Management among core groups. Which of the following statements is valid in this context?

- A. Core groups in same or different sells use the service integration bus to share Workload Management information.
- B. Core groups can overlap by including common servers and the common servers are used to share Workload Management information
- C. Core groups in different cells can only use the core group bridge service to share Workload Management information
- D. Core groups use the core group bridge service to share Workload Management information

Correct Answer: D

QUESTION 5

A system administrator is creating a wsadmin script. Within the script, it is necessary to list the running applications on a server. Which of the following wsadmin scripting objects should be used?

- A. AdminMBeans
- B. AdminConfig
- C. AdminOperations
- D. AdminControl

Correct Answer: D
