**QUESTION 1**

What could cause all the S-TAPs on a particular collector to turn red (in S-TAP Control)?

- A. The GUI is down (port 8443 unavailable).
- B. The SSH daemon on appliance is down (port 22 unavailable).
- C. The GIM server on the appliance is down (port 8081 unavailable).
- D. The inspection core was stopped (ports 9500 and 16016 unavailable).

Correct Answer: D

QUESTION 2

When planning the deployment for Data Activity Monitoring (DAM) there is a need to determine the location of the various Guardium solution components (I.e. Agents, appliances). Which statement is correct?

- A. S-TAP agents need to reside in the same data center the aggregators reside in.
- B. Collectors can report to aggregators that are located in data centers other than their own.
- C. Collectors can reside anywhere in the customer network regardless of database server location.
- D. Aggregators need to reside in the same data center the collectors that report to them (Aggregator) reside.

Correct Answer: B

QUESTION 3

Which component of the Guardium solution makes a decision to terminate database connection as part of Data access level control / blocking functionality?

- A. Functionality within policy running on Guardium collector.
- B. Functionality within CAS agent running on the database server.
- C. Functionality within S-GATE agent running on database server.
- D. Functionality within S-TAP process running on database server.

Correct Answer: A

QUESTION 4

Which sizing statement is correct?

- A. Sizing the number of aggregators required is based directly on database server PVU counts.
- B. When sizing the number of collectors for a Data-Level Access Control (S-GATE), special sizing considerations are required for performance reasons.
- C. When sizing the number of physical collectors for a Data Activity Monitoring, you need to calculate sizing based on the number of virtual appliances plus 50%.
- D. When sizing the number of virtual collectors for a Data Activity Monitoring, you need to calculate sizing based on the number of physical appliances plus 300%.

Correct Answer: B

QUESTION 5

Which statement is true regarding users created in a centrally managed environment?

- A. Every managed unit has its own set of users defined.
- B. Users can be created on any appliance and will be available on all the appliances at once.
- C. Users can only be created on Central Manager but will be propagated to all managed units.
- D. Users can only be created on Central Manager and will be stored on Central Manager only.

Correct Answer: C
