**QUESTION 1**

A company writes a Service level Agreement (SLA) for their backup customers. They agree to backup files every day regardless of whether the files have been modified, and to retain up to 10 backup versions of a file while the file exists on the client file system. Each customer will have their own domain, policy set, management class, and storage pool based on their department name. Which command creates a backup copy group for the Accounting department and meets the SLA requirements?

- A. `define copygroup accounting type=backup destination=accounting_pool verexists=10 mode=absolute`
- B. `define copygroup accounting accounting accounting standard type=backup destination= accounting_pool retexists=10`
- C. `define copygroup accounting accounting accounting type=backup destination= accounting_pool verexists=10 mode=serialization`
- D. `define copygroup accounting accounting accounting standard type=backup destination=accounting_pool verexists=10 mode=absolute`

Correct Answer: D
