**QUESTION 1**

A Data Integrator file is imported. Some of the records in the file can be created/updated successfully and some of the records contain errors. What will the platform do?

- A. Generate only a Data Upload record that lists the errors
- B. Generate only a Data Upload Error record that lists the errors
- C. Generate a Data Upload Error log file on the application server
- D. Generate both a Data Upload Error record and a Data Upload record that list the errors

Correct Answer: D

QUESTION 2

Which workflow type will be a Pre-Create workflow?

- A. Subflow
- B. System
- C. Synchronous
- D. Asynchronous

Correct Answer: C

QUESTION 3

A My Reports report has been designed to return the assets associated with the user logged into the system. When the report is run by the user it returns all the assets in the database. The user has been assigned assets. The assets display correctly in the user's people record and the proper forward association from the perspective of the people Has Assets and the reverse association Is Asset Of has been created. What could be wrong with the report?

- A. The association filter is using the string Has Assets.
- B. The association's filter property Reverse Association is set to Yes.
- C. The association filter is using the keyword \$\$RECORDID\$\$ for the record.
- D. The association filter is using the business object of triPeople as the filter's object.

Correct Answer: C

QUESTION 4

Where in the Admin Console can it be determined which workflows are currently running in the system?

- A. Workflow Events
- B. Threads Manager
- C. Workflows Executing
- D. Workflow Agent Manager

Correct Answer: C

QUESTION 5

An editable query has been created with the name triPeople - triRetired - Editable. The query designer wants to allow the user to be able to unretire multiple records. When the designer goes to set the state in the editable query she does not see the option to set this property. What could be the problem?

- A. The developer has not set the editable property to Yes.
- B. The query type has been set to Report. This type of query is not editable.
- C. There are no editable fields in the triRetired state so this state is excluded.
- D. The record has been set to be uneditable in the triRetired state, so an editable query cannot be created

Correct Answer: A
