QUESTION 1

Which is a driving business need for SOA?

- A. Automate and optimize processes
- B. Security, governance and infrastructure
- C. Governance, infrastructure and connectivity
- D. Interoperability, standards and application integration
- E. High availability of hardware, operational systems and services

Correct Answer: A

QUESTION 2

A retail company is having difficulty implementing changes to its business process. Lines of business maintain their own data stores and proprietary access interfaces. There are several manual steps which involve recapturing of data.

How can they change this process to make it more efficient?

- A. Outsource the shipping function to reduce overhead costs.
- B. Create services that combine application and information assets.
- C. Create shared services to eliminate redundancies in the process.
- D. Choose the latest technology available to integrate the applications and resources.

Correct Answer: C

QUESTION 3

What is a role of Web services in building an SOA?

- A. To provide interoperability using XML-based messages
- B. To provide an interface for human interaction using task lists
- C. To provide loose coupling via remote method invocations using JAX-RPC
- D. To implement the service functionality through interfaces defined in the applications\ BPEL

Correct Answer: A

**QUESTION 4**

A company has prioritized their most important requirements for SOA to be the need to speed up integration, reduce application redundancy and provide the flexibility to change service implementations.

Which type of project should be recommended?

- A. Create a common metadata model that can be used for all development projects.
- B. Implement an Enterprise Service Bus (ESB) and registry/repository as a connectivity layer in the SOA architecture.
- C. Document the existing architecture, legacy systems, and interfaces. Make this available in a common repository that can be accessed by all developers.
- D. Use business modeling tools to model and simulate the application development process and identify bottlenecks. Address highest priority bottlenecks that can be automated to E.

Correct Answer: B

QUESTION 5

A recent strategic corporate directive is demanding a decrease in the operational budget of a cargo airline by 2%. The CIO has indicated a shift to SOA can help gain efficiencies in development costs. The company has just signed a partnership with a package delivery company that requires integration between the systems of the two companies.

When preparing for SOA adoption, what is most important to document to show Return on Investment (ROI) from the shift to SOA?

- A. The current operational budget for the company and the partner company
- B. The current IT governance overlap between the company and the partner company
- C. The current Key Performance Indicators (KPIs) for the company and the partner company
- D. The estimated cost for point-to-point integration with the partner company using the current messaging system

Correct Answer: D
