QUESTION 4

You\'re designing your company\'s eDirectory tree. You\'ve named the tree WIDGETCORP-TREE. Below the tree root, you want to create six Organizational Units that represent each American state and Canadian province where your company has an office. Beneath those Organization Units, you want to create additional Organizational Units that represent each location\'s functional groups. Each office has its own network administrator. To ease administration, you want to create an Admin User object within each location\'s Organizational Unit. Will this design work?

A. Yes, all eDirectory rules have been observed.

B. No, hyphens aren\'t allowed in eDirectory tree names.

C. No, User objects can\'t reside within Organization Units.

D. No, Organizational Units can\'t reside directly below the tree root.

E. No, you can\'t use Organizational Units to represent geographic locations.

F. No, you can\'t create Organizational Units within other Organizational Units.

G. No, you can\'t mix Organizational Units that represent geographic locations with Organization Units that represent functional groups.

Correct Answer: D

QUESTION 5

Which is the proper order for completing tasks when configuring NSS storage on an OES NetWare server?

A. Create storage pools first, then create disk partitions, and then create NSS volumes.

B. Create disk partitions first, then create storage pools, and then create NSS volumes.

C. Create NSS volumes first, then create storage pools, and then create disk partitions.

D. Create disk partitions first, then create NSS volumes, and then create storage pools.

E. Create storage pools first, then create NSS volumes, and then create disk partitions.

F. Create NSS volumes first, then create disk partitions, and then create storage pools.

Correct Answer: B
