QUESTION 1

You have two rules, ten users, and two user groups in a Security Policy. You create database version 1 for this configuration. You then delete two existing users and add a new user group. You modify one rule and add two new rules to the Rule Base. You save the Security Policy and create database version 2. After a while, you decide to roll back to version 1 to use the Rule Base, but you want to keep your user database. How can you do this?

- A. Run `fwm dbexport -1 filename`. Restore the database. Then, run `fwm dbimport -1 filename` to import the users.
- B. Run `fwm_dbexport` to export the user database. Select restore the entire database in the Database Revision screen. Then, run `fwm_dbimport`.
- C. Restore the entire database, except the user database, and then create the new user and user group.
- D. Restore the entire database, except the user database.

Correct Answer: D

QUESTION 2

Fill in the blank: _____ information is included in the "Full Log" tracking option, but is not included in the "Log" tracking option?

- A. file attributes
- B. application
- C. destination port
- D. data type

Correct Answer: D

Tracking Options

Network Log - Generates a log with only basic Firewall information: Source, Destination, Source Port, Destination Port, and Protocol. Log - Equivalent to the Network Log option, but also includes the application name (for example, Dropbox), and application information (for example, the URL of the Website). This is the default Tracking option.

Full Log - Equivalent to the log option, but also records data for each URL request made.

-

If suppression is not selected, it generates a complete log (as defined in pre-R80 management).

-

If suppression is selected, it generates an extended log (as defined in pre-R80 management).

None - Do not generate a log.
