QUESTION 1

Damon enables an SMTP resource for content protection. He notices that mail seems to slow down on occasion, sometimes being delivered late. Which of the following might improve throughput performance?

- A. Configuring the SMTP resource to bypass the CVP resource
- B. Increasing the Maximum number of mail messages in the Gateway's spool directory
- C. Configuring the Content Vector Protocol (CVP) resource to forward the mail to the internal SMTP server, without waiting for a response from the Security Gateway
- D. Configuring the CVP resource to return the mail to the Gateway
- E. Configuring the SMTP resource to only allow mail with Damon's company's domain name in the header

Correct Answer: C

QUESTION 2

Which of the following items can be provisioned via a Profile through Smart Provisioning? i) Backup Schedule ii) DNS Entries iii) Hosts Table iv) Domain Name v) Interface IP's

- A. i, ii, iii, iv, v
- B. i, ii, iii, iv
- C. i
- D. i, ii, iv

Correct Answer: B

QUESTION 3

You are troubleshooting a HTTP connection problem. You've started fw monitor -o http.pcap. When you open http.cap with Wireshark there is only one line. What is the most likely reason?

- A. fw monitor was restricted to the wrong interface.
- B. Like SmartView Tracker only the first packet of a connection will be captured by fw monitor.
- C. By default only SYN packets are captured.
- D. Acceleration was turned on and therefore fw monitor sees only SYN.

Correct Answer: D

QUESTION 4

You are preparing computers for a new ClusterXL deployment. For your cluster, you plan to use four machines with the following configurations:

Cluster Member 1: OS:Secure Platform, NICs: QuadCard, memory: 1 GB, Security Gateway only, version:R76

Cluster Member 2: OS:Secure Platform, NICs: 4 Intel 3Com, memory: 1 GB, Security Gateway only, version:R76

Cluster Member 3: OS:Secure Platform, NICs: 4 other manufacturers, memory: 512 MB, Security Gateway only, version:R76

Security Management Server: MS Windows 2003, NIC. Intel NIC (1), Security Gateway and primary Security Management Server installed, version:R76

Are these machines correctly configured for a ClusterXL deployment?

- A. No, the Security Gateway cannot be installed on the Security Management Pro Server.
- B. No, Cluster Member 3 does not have the required memory.
- C. Yes, these machines are configured correctly for a ClusterXL deployment.
- D. No, the Security Management Server is not running the same operating system as the cluster members.

Correct Answer: C

QUESTION 5

Wayne configures an HTTP Security Server to work with the content vectoring protocol to screen forbidden sites. He has created a URI resource object using CVP with the following settings:

Use CVP

Allow CVP server to modify content

Return data after content is approved

He adds two rules to his Rule Base: one to inspect HTTP traffic going to known forbidden sites, the other to allow all other HTTP traffic.

Wayne sees HTTP traffic going to those problematic sites is not prohibited.

What could cause this behavior?

- A. The Security Server Rule is after the general HTTP Accept Rule.
- B. The Security Server is not communicating with the CVP server.
- C. The Security Server is not configured correctly.
- D. The Security Server is communicating with the CVP server, but no restriction is defined in the CVP server.

Correct Answer: A
