QUESTION 1

What type of object may be explicitly defined as a MEP VPN?

A. Mesh VPN Community

B. Any VPN Community

C. Remote Access VPN Community

D. Star VPN Community

Correct Answer: D

QUESTION 2

An administrator has installed the latest HFA on the system for fixing traffic problems after creating a backup file. A large number of routes were added or modified, causing network problems. The Check Point configuration has not been changed. What would be the most efficient way to revert to a working configuration?

A. A back up cannot be restored, because the binary files are missing.

B. The restore is not possible because the backup file does not have the same build number (version).

C. Select Snapshot Management from the SecurePlatform boot menu.

D. Use the command restore and select the appropriate backup file.

Correct Answer: D

QUESTION 3

What is a "sticky" connection?

A. A Sticky Connection is one in which a reply packet returns through the same gateway as the original packet.

B. A Sticky Connection is a VPN connection that remains up until you manually bring it down.

C. A Sticky Connection is a connection that remains the same.

D. A Sticky Connection is a connection that always chooses the same gateway to set up the initial connection.

Correct Answer: A

QUESTION 4

What is theSmart EventClient\'s function?

A. Display received threats and tune the Events Policy.

B. Generate a threat analysis report from the Reporter database.

C. Invoke and define automatic reactions and add events to the database.

D. Assign severity levels to events.

Correct Answer: A

QUESTION 5

Which of the following statements accurately describes the migrate command?

A. upgrade_export is used when upgrading the Security Gateway, and allows certain files to be included or excluded before exporting.

B. upgrade_export stores network-configuration data, objects, global properties, and the database revisions prior to upgrading the Security Management Server.

C. Used primarily when upgrading the Security Management Server, migrate stores all object databases and the conf directories for importing to a newer version of the Security Gateway

D. Used when upgrading the Security Gateway, upgrade_export includes modified files, such as in the directories /lib and /conf.

Correct Answer: C
