**QUESTION 1**

The External Virtual Router is associated with a dedicated interface. It is considered to be which type of interface?

- A. Warp
- B. Synchronization
- C. Virtual
- D. Physical
- E. Symbolic

Correct Answer: D

---

**QUESTION 2**

Consider the following scenario: Your network configuration requires that you configure a single interface on the VSX Gateway to lead to multiple networks. A different Virtual System must protect each network sending traffic through the VSX Gateway. You configured a dedicated management interface on the VSX Gateway, along with 1 External Virtual Router and 4 Virtual Systems, one for each Customer. Which of the following hardware devices must be used to connect the different networks to the single shared interface?

- A. Frame cache-redirection enabled switch
- B. Content-intelligent switch
- C. Jumbo frame-enabled switch
- D. Router
- E. VLAN-capable switch

Correct Answer: E

---

**QUESTION 3**

What is the term used to describe a port or interface that shares traffic from more than one VLAN?

- A. Frame-Strata enabled
- B. VLAN riding
- C. Comprehensive layer-2 label support
- D. VLAN trunking
- E. Comprehensive VLAN Tag support

Correct Answer: D

---

#### QUESTION 4

When configuring a Virtual System interface leading to a Virtual Switch, the default Gateway must be:

- A. The IP address of the Virtual Switch.
- B. The IP address of the Management Virtual System.
- C. The IP address of a device outside the VSX Gateway.
- D. Excluded. No default Gateway is used when passing traffic through a Virtual Switch.
- E. Shared among all systems passing through the switch.

Correct Answer: C

---

#### QUESTION 5

In a standard VSX configuration, each Virtual System is configured with which of the following interfaces?

- A. One leading to the Management Virtual System, and one leading to the Internal Virtual Router/Switch
- B. One leading to the Management Virtual System, and one leading to the External Virtual Router
- C. One leading to a router on the external network, and one for the physical interface leading to the protected network
- D. One leading to the External Virtual Router/Switch, and one for the physical interface leading to the protected network
- E. One for the physical interface leading to the protected network, and one leading to the Management Virtual System

Correct Answer: D
