QUESTION 1

What are the benefits of using Streamed VHD?

- A. It retains the single image management function while allowing users to install applications.
- B. It provides a high level of security while allowing user customization.
- C. It has a low storage performance requirement and high user density.
- D. It delivers low-cost and high application compatibility.

Correct Answer: B

QUESTION 2

Which two design decisions should the architect recommend to improve the user experience? (Choose two.)

- A. Configure Clipboard policy
- B. Configure Drive encryption
- C. Configure Flash redirection
- D. Configure Media redirection

Correct Answer: CD

QUESTION 3

Scenario: The company is designing a cost-efficient environment for the call center workers. The IT department is replacing the existing thin clients with newer models. What are the benefits of using Hosted VDI by using cloned VM templates?

- A. Highest user density and lowest cost
- B. Highest level of user personalization
- C. Lowest storage performance requirement and highest user density
- D. Rapid provisioning

Correct Answer: D

QUESTION 4

Scenario: The company is designing a cost-efficient environment for the call center workers. The IT department is replacing the existing thin clients with newer models. What are the benefits of using Streamed VHD?

- A. The ability to use local client hardware
- B. Highest level of user personalization
- C. Supports a variety of hardware configurations from a single image
- D. Remote access to applications

Correct Answer: D

QUESTION 5

Why should CPU consumption be used to identify bottlenecks?

- A. High CPU utilization of the Delivery Controller can indicate a high volume of user logons, indicating that the server may NOT have sufficient resources to handle the load.
- B. High CPU utilization on the Delivery Controller can indicate that the target device will encounter delays when mounting new vDisks.
- C. High CPU utilization of the Delivery Controller may indicate that a high number of processor- intensive applications are being utilized by the virtual desktop users.
- D. High CPU utilization of the Delivery Controller can indicate the presence of a virus or malware.

Correct Answer: A
