QUESTION 1

Scenario: A XenApp administrator must recommend a database option for the new XenApp 6.5 data store. The new farm will have more than 100 XenApp servers and 500 published resources, support more than 5,000 concurrent users and have two zones separated by a WAN connection.

Which two database options should the administrator recommend? (Choose two.)

- A. IBM DB2 9.7
- B. Oracle Enterprise 11.1
- C. Microsoft SQL Server 2008
- D. Microsoft SQL Server Express 2008

Correct Answer: BC

QUESTION 2

XenApp users need to be able to move between client devices and reconnect to both active and disconnected sessions.

Which action must an administrator take to enable this behavior?

- A. Install Web Interface and XenApp with the default settings
- B. Disable Workspace Control on each Web Interface server
- C. Configure a XenApp policy to enable the Smooth Roaming feature
- D. Ensure that the Web Interface server is in the same domain or forest as the XenApp farm

Correct Answer: A

QUESTION 3

Scenario: A XenApp administrator has been tasked with building XenApp servers as generically as possible. Other than the operating system, required updates, patches and anti-virus software, the servers are to be kept as identical as possible to allow for quick disaster recovery should the need arise. Bandwidth is restricted and the client machines run operating systems other than Windows. Therefore, streaming applications to the client machines is NOT possible.

Which setting must the administrator select when publishing the application?

- A. Streamed to client
- B. Accessed from a server, streamed to server
- C. Accessed from a server, installed application
- D. Streamed if possible, otherwise accessed from a server

Correct Answer: B

QUESTION 4

When using the Gateway Direct secure access method in the Web Interface, the XenApp administrator must provide the _____ of the Access Gateway server. (Choose the correct option to complete the sentence.)

- A. IP address
- B. SSL certificate
- C. NetBIOS name
- D. Fully Qualified Domain Name (FQDN)

Correct Answer: D

QUESTION 5

A Citrix XenApp administrator needs to apply a policy to all users regardless of connection type. Which type of policy should the administrator create?

- A. Unfiltered User policy
- B. Unfiltered Computer policy
- C. User policy filtered by worker group
- D. Computer policy filtered by worker group

Correct Answer: A
