### QUESTION 1

Scenario: A company is testing application streaming to allow workers to use their applications offline. The application being tested is Adobe Reader. The test is successful and now the administrators need to stream Microsoft Office 2010 also. Users must be able to read PDF files that are attached to emails opened in Microsoft Outlook 2010.

Which action must the administrator take to meet the requirements of the scenario?

- A. Publish the two applications with the same settings from the AppCenter.
- B. Precache the two packages on the users\' computers instead of streaming them at launch time.
- C. Link the Adobe Reader streaming package to the Office 2010 streaming package during profiling of the Office 2010 package.
- D. When profiling, choose \'Advanced Install - Select files and folders\' and copy the application executables from the two applications into each application profile.

Correct Answer: C

---

### QUESTION 2

An application is published to users using the \'Streamed to client\' delivery type.

Which two plug-ins are required and where are they required for this application? (Choose two.)

- A. Online plug-in on the client
- B. Offline plug-in on the client
- C. Offline plug-in on the XenApp server
- D. Online plug-in on the XenApp server

Correct Answer: AB

---

### QUESTION 3

- A. as a Citrix Administrator in the AppCenter
- B. into the contacts for the company in mycitrix.com
- C. to the Purchasing Active Directory group in the company
- D. as a Domain Administrator in the company\'s Active Directory

Correct Answer: B

---

**QUESTION 4**

An administrator is using the AppCenter to control the logon settings for a XenApp 6.5 farm.

Which four of the listed options are valid logon control settings for servers in the AppCenter? (Choose four.)

- A. Drain
- B. Prohibit logons only
- C. Drain until next restart
- D. Allow logons and reconnections
- E. Prohibit logons until server restart
- F. Prohibit logons and reconnections

Correct Answer: BDEF

---

**QUESTION 5**

Scenario: A XenApp administrator needs to publish an application that will be streamed to traveling users so they can launch the application when they are NOT connected to the network. The administrator also needs to provide the published application over an ICA connection. The user devices have been equipped with the appropriate plug-ins.

Which setting should the administrator choose when publishing the application?

- A. Streamed to client
- B. Installed application
- C. Accessed from a server
- D. Streamed if possible, otherwise accessed from a server

Correct Answer: D
