**QUESTION 1**

An administrator is configuring a virtual server for encrypted traffic from clients that needs to be decrypted prior to being forwarded to the back-end servers.

Which type of virtual server and service should the administrator configure?

- A. SSL server and service
- B. SSL\_TCP virtual server and service
- C. SSL\_TCP virtual server and TCP service
- D. TCP virtual server and SSL\_TCP service

Correct Answer: C

---

**QUESTION 2**

An administrator must first enable the \_\_\_\_\_ feature before a URL transformation policy can be used in a network environment. (Choose the correct option to complete the sentence.)

- A. rewrite
- B. responder
- C. content filtering
- D. URL transformation

Correct Answer: A

---

**QUESTION 3**

Scenario: An ISP provides SaaS to enterprise customers as part of a cloud offering. A NetScaler is configured to support multi-tenant deployments. Traffic isolation for each enterprise (tenant) is achieved using VLAN segmentation for each enterprise customer. As an example, incoming client requests from enterprise customers are assigned to separate VLANs. Which feature can an administrator configure to specify that the VIP for customer1 will only listen to requests coming from VLAN1 and the VIP from customer2 will only listen for requests from VLAN2?

- A. Static Routes
- B. Policy-based routing
- C. MAC-based Forwarding
- D. Network-aware policies

Correct Answer: D

---

**QUESTION 4**

What must an administrator configure when adding a new SNMP manager to a NetScaler configuration using the Configuration Utility?

- A. Source port
- B. SNMP community string
- C. Source Interface Number
- D. SNMP manager IP address
- E. SNMP Trap Type (Basic or Advanced)

Correct Answer: D

---

**QUESTION 5**

Scenario: An administrator would like to set an organization's homepage search engine type to display differently based on a user's browser. If a user accesses the homepage from an Internet Explorer browser, then the Bing search engine should be displayed. If a user accesses the homepage using a Google Chrome browser, then the Google search engine should be displayed.

Which feature could an administrator use to meet the needs of the scenario?

- A. Responder
- B. Rate limiting
- C. Priority Queuing
- D. Content Filtering

Correct Answer: A
