QUESTION 1

Which two are true about Optimizer Statistics? (Choose two.)

- A. They are automatically updated when DDL statements execute
- B. They can be gathered by executing the PL/SQL procedures in the DBMS_STATS package
- C. They are gathered by the Manageability Monitor (MMON) background process
- D. They provide information to the Optimizer so that it can determine optimal execution plans for SQL statements
- E. They can be used to determine the events on which a database instance waited
- F. They do not persist across instance restarts

Correct Answer: BD

QUESTION 2

The database instance has the following parameter setting: OS_AUTHENT_PREFIX = OPS\$ OS_ROLES = FALSE REMOTE_OS_AUTHENT = FALSE REMOTE_OS_ROLES = FALSE TIMED_OS_STATISTICS = 0 You have a local operating system user SKD. You create a database user OPS\$SKD, and then assign

external authentication. The user OPS\$SKD has the CREATE SESSION privilege. What would you achieve by the above process?

- A. The database user OPS\$SKD will be able to administer the database.
- B. The authentication detail for the database user OPS\$SKD is recorded in the password file.
- C. The local operating system user SKD will be able to access the database instance without specifying the username and password.
- D. The database user OPS\$SKD has to login with the password of the local operating system user SKD to access the database instance.

Correct Answer: C

QUESTION 3

Examine the command: SQL>DBMS_STATS.SET_TABLE_PREFS('\SH\','CUSTOMERS','PUBLISH','false'); Which statement describes the effect of the above command?

- A. Automatic statistics collection is stopped for the CUSTOMERS table
- B. Statistics for the CUSTOMERS table are locked and cannot be overwritten
- C. Existing statistics for the CUSTOMERS table become unusable for the query optimizer
- D. Subsequently, statistics gathered on the CUSTOMERS table are stored as pending statistics

Correct Answer: D

QUESTION 4

Examine these facts about a database:

The database default tablespace is USERS DEFERRED_SEGMENT_CREATION IS TRUE The default tablespace of USER1 is tbs1 USER1 has only these privileges: CREATE SESSION CREATE TABLE UNLIMITED quota on tbs1

Examine these commands executed by USER1: What will be the outcome of the INSERT operation and why?

```
SQL> CREATE TABLE emp(eno NUMBER, ename VARCHAR2 (20)) TABLESPACE  
TBS1;  
Table created.
```

```
SQL> CREATE INDEX emp_idx ON emp(eno) TABLESPACE USERS;  
Index created.
```

```
SQL> INSERT INTO emp VALUES (NULL, 'Alan');
```

- A. A row will be inserted into EMP and an index entry will be inserted into a virtual column of EMP because USER1 has no quota on USERS
- B. It will fail because an indexed column cannot have NULL values
- C. It will fail because USER1 has no quota on USERS
- D. A row will be inserted into EMP but no index entry will be made into EMP_IDX
- E. A row will be inserted into EMP and an index entry will be made into EMP_IDX

Correct Answer: E

QUESTION 5

User SCOTT executes the following command on the EMP table but has not issued COMMIT, ROLLBACK, or any data definition language (DDL) command:

```
SQL> SELECT ename FROM emp  
2 WHERE job='CLERK' FOR UPDATE OF empno;
```

SCOTT has opened another session to work with the database instance.

Which three operations would wait when issued in SCOTT's second session? (Choose three.)

- A. LOCK TABLE emp IN SHARE MODE;
- B. LOCK TABLE emp IN EXCLUSIVE MODE;

C. UPDATE emp SET sal=sal*1.2 WHERE job=\\'MANAGER\\'

D. INSERT INTO emp(empno,ename) VALUES (1289,\\'Harry\\');

E. SELECT ename FROM emp WHERE job=\\'CLERK\\' FOR UPDATE OF empno;

Correct Answer: ABE
