QUESTION 1

In your database instance, the user sessions are connected to the database server from the remote machines. You want to achieve the following for these users:

1.
The user account must be locked after four unsuccessful login attempts.
2.
The user must be prompted to change the password at regular intervals.
3.
The user may not have more than three simultaneous sessions.
4.
The user session must automatically be logged off if more than 10 minutes elapsed time used. How would you accomplish the above?
 - A. By assigning profiles for the users
 - B. By implementing Fine-Grained Auditing (FGA)
 - C. By granting a secure application role to the users
 - D. By implementing the Database Resource Manager plan

Correct Answer: A

QUESTION 2

Which four are true about transaction, table, and row locks in an Oracle Database? (Choose four.)

- A. Transaction locks are released when that transaction executes a COMMIT statement
- B. DML statements lock modified tables in exclusive mode
- C. Transaction locks are released when that transaction executes a ROLLBACK statement
- D. DDL statements never lock the objects that they modify
- E. A table's row-level locks escalate to table locks when a majority of rows in that table are locked in exclusive mode
- F. SELECT statements are never blocked by row-level locks
- G. DML statements lock modified rows in exclusive mode

Correct Answer: BCFG

QUESTION 3

You are in the middle of a transaction updating a very important table. The machine on which a database was running reboots because of power outage. This caused a database instance failure.

Which statement is true in this situation?

- A. The online redo log files and archived redo log files are required to accomplish the recovery
- B. The uncommitted transaction will be committed at the next startup of the database instance
- C. The uncommitted transaction is rolled back automatically at the next opening of the database
- D. The DBA has to perform the recovery on the database to recover the uncommitted transaction

Correct Answer: C

QUESTION 4

You plan to configure the new Oracle Database 11g installation by performing these tasks:

-Use Automatic Storage Management (ASM) as the storage option.

-

Use Oracle Enterprise Manager Database Control to manage the database.

-

Provide the same password for SYS, SYSTEM, SYSMAN, and DBSNMP accounts during the installation.

-Configure the database to send email notifications. Some tools available to you for installation are:

1: Oracle Universal Installer (OUI)

2: Database Configuration Assistant (DBCA)

3: Database Upgrade Assistant (DBUA)

4:

Oracle Net Configuration Assistant Which tools would you use for this installation?

A.

2

B.

3

C.

1 and 2

D.

3 and 4

E.

1,2 and 4

Correct Answer: E

QUESTION 5

Which three are true about UNDO data? (Choose three.)

A. It is used during online backups to guarantee their consistency

B. It is used to roll back failed transactions

C. It is used to recover dropped tables by using FLASHBACK TABLE ... TO BEFORE DROP

D. It is used to rewind a database by using FLASHBACK DATABASE

E. It is used to provide read consistency

F. It is used to enable ROLLBACK statements to roll back uncommitted updates

Correct Answer: DEF
