QUESTION 1

An employee salary in the non-partitioned EMPLOYEES table, has been updated but the transaction is uncommitted.

Which two types of lock are held by the transaction? (Choose two.)

- A. a row level lock on the row being updated
- B. a null lock on the row being updated
- C. a row shared lock on the EMPLOYEES table
- D. an exclusive lock on the EMPLOYEES table
- E. a null lock on the EMPLOYEES table

Correct Answer: AC

QUESTION 2

Examine these steps:

```
CONNECT / AS SYSDBA
```

```
CREATE DIRECTORY dumpdir AS '\\u01/app\';
```

Directory created.

```
GRANT READ, WRITE ON DIRECTORY dumpdir TO PUBLIC;
```

Grant succeeded.

```
CREATE USER TEST IDENTIFIED BY test;
```

User created.

```
GRANT CREATE SESSION, RESOURCE, UNLIMITED TABLESPACE TO test;
```

Grant succeeded.

```
CONN test/test
```

Connected.

```
CREATE TABLE test_employees (id NUMBER(3), name VARCHAR2(20), salary NUMBER(7));
```

Table created.

```
SQL> CREATE SYNONYM emp FOR test_employees;
```

Synonym created.

Now examine this command:

```
$ expdp test/test DIRECTORY=dumpdir DUMPFILE=test_emp.dmp LOGFILE=test.log TABLES=emp  
CONTENT=data_only query=\\'EMP:"WHERE salary=12000"\\' What is true about the execution of this command?
```

- A. It throws an error as the QUERY parameter is not supported on an empty table.
- B. It throws an error as the table test_employees is empty and CONTENT=data_only is specified.
- C. It performs the export successfully.
- D. It throws an error as Data Pump cannot find a table called TEST.EMP.

Correct Answer: C

QUESTION 3

When does a database checkpoint occur?

- A. When there is an online redo log switch.
- B. When a user session terminates abnormally.
- C. When a server process terminates abnormally.
- D. When the SHUTDOWN ABORT command is issued.

Correct Answer: A

QUESTION 4

Which statement is true about using the Export/Import method for migrating data when upgrading to Oracle Database 12c?

- A. It automatically restarts a Data Pump Export or Import job after a failure is connected and the job continues from the point of failure.
- B. It can be used to migrate a database only if the source and target databases are hosted on the same endian format.
- C. It can be used to migrate a database only if the source database does not have any tablespace in read-only mode.
- D. It allows migration of a database directly over network links.

Correct Answer: D

QUESTION 5

In your Oracle 12c database, you plan to execute the command:

```
SQL> CREATE TABLESPACE tbs1 DATAFILE '/u02/oracle/data/tbs01.dbf' SIZE 50M;
```

The u02 file system has 1 GB of free space available.

What is the outcome?

- A. It creates a locally managed tablespace with manual segment space management enabled.
- B. It raises an error because extent management is not specified.
- C. It creates a locally managed tablespace with automatic segment space management enabled.
- D. It creates a dictionary-managed tablespace with manual segment space management enabled.

Correct Answer: C
