**QUESTION 1**

You have been asked to correct a problem with a form that was created by another developer. Users complain that they are unable to query on the employee Hire Date, which is a base table item.

What is a possible cause for this problem?

- A. The Hire Date item is a display item.
- B. The Hire Date item has its Enabled property set to No.
- C. The Hire Date item has its Query Allowed property set to Yes.
- D. The Hire Date item width is not large enough to display the complete date.

Correct Answer: A

QUESTION 2

A user has requested a change to the Summit.fmb module. The form has two windows, DEPT_WIN and EMP_WIN. DEPT_WIN is always visible to the user. However, EMP_WIN is only occasionally required to be open. The user complains that once EMP_WIN is open, it is not possible to make the window invisible.

The user can navigate between the open windows. You are asked not to write code to close EMP_WIN explicitly.

What changes should you make to the Summit form?

- A. Define EMP_WIN as a modal window and set the Hide on Exit property to No.
- B. Define EMP_WIN as a modal window and set the Hide on Exit property to Yes.
- C. Define EMP_WIN as a modal window and set the Close Allowed property to Yes.
- D. Define EMP_WIN as a modeless window and set the Hide on Exit property to No.
- E. Define EMP_WIN as a modeless window and set the Hide on Exit property to Yes.
- F. Define EMP_WIN as a modeless window and set the Close Allowed property to Yes.

Correct Answer: E

QUESTION 3

You should enable the user to add additional values to a list item at run time. You must also ensure that the Record Group LOCATIONS, which is used to populate the list item, can be updated with any user-supplied value.

What two actions could you take to accomplish this? (Choose two.)

- A. Add a new value to the list item by calling the POPULATE_LIST built-in.
- B. Add a new value to LOCATIONS by calling the POPULATE_GROUP built-in.
- C. Add a new value to the list item by calling the ADD_LIST_ELEMENT built-in.
- D. Remove duplicate values in LOCATIONS by calling the DELETE_LIST_ELEMENT built-in.
- E. Add a new value to LOCATIONS by calling the ADD_GROUP_ROW and SET_GROUP_CHAR_CELL built-ins.
- F. Add a new value to LOCATIONS by calling the ADD_GROUP_ROW and SET_GROUP_NUMBER_CELL built-ins.

Correct Answer: CE

QUESTION 4

There is a requirement to invoke the Orders form from the Customers form. Your colleagues offer some suggestions about which built-in to use and their reasons for the choice. Which suggestion names a built-in that will meet the requirement and offers a correct reason?

- A. CALL_FORM, because NEW_FORM is no longer valid for Web-deployed forms due to the extra network traffic that it causes
- B. CALL_FORM, because it can be issued in Enter-Query mode and can be constrained to be "query only"
- C. CALL_FORM, because the second form is invoked in a modeless state and it saves on memory resources
- D. NEW_FORM, because the second form is invoked in a modeless state and the user can navigate freely between the two running forms
- E. OPEN_FORM, because the second form is invoked in a modal state and there can be only one "Open form stack"
- F. OPEN_FORM, because it causes a savepoint to be issued and the current form is validated before invoking the second form.

Correct Answer: B

QUESTION 5

The menu that appears by default in a Forms application does not quite meet your needs, so you decide to create a custom menu. You create and compile a menu module called Test with three submenus that contain PL/SQL code, and you attach the Test menu to a form.

How will the menu of the form appear and perform at run time?

- A. You will see only the three submenus from the Test menu (plus the Window menu that is usually displayed), and you will not be able to callcode from the default menu in your form.
- B. You will see the three submenus from the Test menu merged with the submenus of the default menu (plus the

Window submenu that is usually displayed).

C. You will see only the submenus of the default menu (plus Window), but you will be able to call code from the Test menu in your form.

D. You will see only the Test menu submenus (plus Window), but you will be able to call code from the default menu in your form.

E. You will see only the submenus of the default menu (plus Window) until you issue the REPLACE_MENU built-in in the form.

Correct Answer: A
