QUESTION 1

What are action links used for?

- A. Direct navigation from source application to BI reports
- B. Direct navigation from BI record to transactional data source
- C. Functionality to invoke iBots
- D. Drilling down to transactional-level data within the report

Correct Answer: B

QUESTION 2

How can you be sure that all ETL tasks are executed in the right ordering by Informatica?

- A. You can be sure after a successful batch run of the ETL in Informatica Powercenter.
- B. You can never be really sure.
- C. Execute all ETL using DAC Subject Areas embedded in execution plans. DAC will calculate the ordered tasks.
- D. Execute single ETL mappings in parallel in Informatica Powercenter Workflow Manager.
- E. Answers A or D.

Correct Answer: C

QUESTION 3

Which statement is true about the safe path in SDE and SIL mappings when implementing a Type I customization?

- A. The safe path is used by all lookup data and is used to populate variables.
- B. The safe path columns in a mapping should not be duplicated or renamed.
- C. The safe path defines a path through which all extension logic should be routed and is indicated in the mapping by a placeholder column named x_custom.
- D. The safe path defines a path through which all extension logic should be routed and is indicated in the mapping by a placeholder column named x_safePath.

Correct Answer: C

QUESTION 4

Which task level parameter(s) control(s) the granularity of data in Aggregate tables?

- A. TIME_GRAIN only
- B. GRAIN_LEVEL only
- C. GRAIN only
- D. TIME_GRAIN or GRAIN

Correct Answer: A

QUESTION 5

The Out of the Box BI Applications reports that are included on the dashboards are role based. How do you support these roles specifically in workflows?

- A. Roles can be supported in workflows by using session variables as filter in permission settings such as enabling access permissions for user groups and data security, defining workflows by guided navigation and column behavior, dashboard links and conditional guided navigation on dashboard sections.
- B. Roles can be supported in workflows only by enabling session variables in connection pools.
- C. Roles can be supported in workflows entirely by defining dimensional hierarchies and using the default drill functionality.
- D. Roles can be supported in workflows only by conditional formatting and using the STYLE session variable.
- E. Roles can be supported in workflows by user groups, data security, and conditional formatting.

Correct Answer: A
