**QUESTION 1**

In Task Automation, a link in a task flow:

- A. Passes the point of view to a stage
- B. Connects the task to a specific user
- C. Passes control from one stage to another
- D. Passes control from a task to the IT department
- E. Passes a process unit from one review level to the next review level

Correct Answer: C

---

**QUESTION 2**

You are designing the custom dimensions for your FM application. Identify the true statement.

- A. A dimension, once used for a specific purpose, can be used only for that purpose.
- B. All hierarchies within a custom dimension are automatically available to all the accounts.
- C. You specify the custom dimension members valid for an account by using the Custom1 Top Member, Custom2 Top Member, Custom3 Top Member, and Custom4 Top Member.
- D. Hierarchies on custom dimensions must be symmetrical, with the same number of children under every parent.
- E. Different hierarchies within a custom dimension cannot be assigned to different accounts.

Correct Answer: C

---

**QUESTION 3**

You need to track and report an additional level of detail for journal entries, tracking whether the adjustment came from the GL, legal, or other source. Identify the best method to meet this requirement.

- A. It is not possible to track additional levels of detail in journals.
- B. Build a custom dimension to capture the additional level of detail.
- C. Build subaccounts in the Accounts dimension to capture the additional level of detail.
- D. Use commentary to note the sources of journals.
- E. Use line item details.

Correct Answer: B

---

**QUESTION 4**

Identify the three true statements about Financial Reporting. (Choose three.)

- A. Financial Reporting provides highly formatted, printable reports for FM applications.
- B. Financial Reporting provides ad hoc reporting capabilities for FM applications.
- C. Financial Reporting document types include reports, books, snapshots, and snapshot books.
- D. You can create a single PandL report and run that report for any member in the Entity dimension

Correct Answer: ACD

---

**QUESTION 5**

The Value dimension stores detail from child to parent for which dimension?

- A. View
- B. Entity
- C. Account
- D. Currency
- E. Scenario

Correct Answer: B

The Value dimension represents the different types of values stored in your application, and can include the input currency, parent currency, adjustments, and consolidation detail such as proportion, elimination, and contribution detail. For example, the Entity Currency member stores the value for an entity in its local currency. The Parent Currency member stores the value for an entity translated to the currency of its parent entity. The Value dimension is useful for providing an audit trail of the transactions applied to data.
