### QUESTION 1

Which statement is true about web container session management?

- A. Access to session-scoped attributes is guaranteed to be thread-safe by the web container.
- B. To activate URL rewriting, the developer must use the `HttpServletResponse.setURLRewriting` method.
- C. If the web application uses HTTPS, then the web container may use the data on the HTTPS request stream to identify the client.
- D. The JSESSIONID cookie is stored permanently on the client so that a user may return to the web application and the web container will rejoin that session.

Correct Answer: C

---

### QUESTION 2

Which of the following are attributes of the annotation `javax.servlet.annotation.WebFiler`?

- (i)  
Name
  - (ii)  
servletNames
  - (iii) urlPatterns
  - (iv)  
dispatcherTypes
  - (v)  
supportAsync
- A.  
(iii) only
  - B.  
(iii) and (iv)
  - C.  
(ii), (iii) and (iv)
  - D.  
(iii), (iv) and (v)

E.

(ii), (iii), (iv) and (v)

Correct Answer: B

\*

(iii) urlPatterns

The URL patterns to which the filter applies

\*

(iv) dispatcherTypes

The dispatcher types to which the filter applies

\*

(not V): asyncSupported

Declares whether the filter supports asynchronous operation mode.

Note:

\*

javax.servlet.annotation.Annotation Type WebFilter

Annotation used to declare a servlet filter.

This annotation is processed by the container at deployment time, and the corresponding filter applied to the specified URL patterns, servlets, and dispatcher types.

---

### QUESTION 3

Users of your web application have requested that they should be able to set the duration of their sessions. So for example, one user might want a webapp to stay connected for an hour rather than the webapp's default of fifteen minutes; another user might want to stay connected for a whole day.

Furthermore, you have a special login servlet that performs user authentication and retrieves the object from the database. You want to augment this code to set up the user's specified session duration.

Which code snippet in the login servlet will accomplish this goal?

A. User user = // retrieves the user objects object from the database session.setDurationInterval (user.getSessionDuration());

B. User user = // retrieves the User objects from the database session.setInactiveInterval (user.getSessionDuration());

C. User user = // retrieves the user objects object from the database session.setInactiveInterval (user.get.SessionDuration());

D. User user = // retrieves the user objects object from the database session.setDuration (user.getSessionDuration());

E. User user = // retrieves the user objects object from the database session.setMaxInactiveInterval (user.getSessionDuration());

F. User user = // retrieves the user objects object from the database session.setMaxDurationInterval (user.getSessionDuration());

Correct Answer: E

#### QUESTION 4

Given the java code snippet in contextIntialized method of a ServletContextListner:

```
ServletRegistration.Dynamic sr = (ServletRegistration.Dynamic)sc.addServlet ("myServlet", myServletClass);  
sr.addMapping("/abc");  
sr.setServletSecurityElement(servletSecurityElement); sr.addMapping("/def");
```

Which statement is true?

- A. "/abc" is mapped to "myservlet". The servletSecurityElementy applies to both "/abc" and "/def".
- B. Both "/abc" and "/def" are mapped to "myservlet". The servletSecurityElementy applies to "/abc".
- C. Both "/abc" and "/def" are mapped to "myservlet". The servletSecurityElementy applies to "/def".
- D. Both "/abc" and "/def" are mapped to "myservlet". The servletSecurityElementy applies to both "/abc" and "/def".
- E. Both "/abc" and "/def" are mapped to "myservlet". The servletSecurityElementy applies to "/abc", but the behavior for "/def" is not specified.

Correct Answer: E

Note:

\* addMapping

```
public void addMapping(java.lang.String namespace,  
java.lang.String name,  
java.lang.Class clazz)
```

Defines a direct mapping from a namespace and name to a java class (and vice versa)

#### QUESTION 5

Given the annotation for MyServlet:

```
@WebServlet{"/abc"}
```

```
@ServletSecurity (value=@HttpConstraint)
```

public class Myservlet extends HttpServlet {

Which two are true? (Choose two)

- A. No protection of user data must be performed by the transport.
- B. All user data must be encrypted by the transport.
- C. Access is to be denied independent of authentication state and identity.
- D. Only authenticated users are to be permitted.
- E. Access is to be permitted independent of authentication state and identity.

Correct Answer: BC
