Correct Answer: D

QUESTION 2

Dylan is trying to decide where to host his small personal website. He thinks his best option would be to

get a Web site hosting account with an Internet. Service Provider (ISP).

Which of the following is a reason that would support this decision?

A. Hosting with an ISP is the only way to ensure that a site is available to all users worldwide.

B. ISPs often offer a large selection of Web applications at no extra charge.

C. Hosting your site with an ISP ensures your site is validated to W3C standards.

D. An ISP will often block a site from loading if it is self-hosted, due to security concerns.

Correct Answer: C

QUESTION 3

When starting a new project, many website designers develop a single page that includes all the fonts, sizes, white space, and colors they want. This becomes their page template for the rest of the site. Why is this practice important?

A. It helps them determine which WYSIWYG code editor they should use.

B. It insures they are properly separating the HTML5 coding from the CSS3 styling.

C. It ensures the site has a consistent look and format.

D. It proves the rest of the site will validate to current HTML5 standards.

Correct Answer: B

QUESTION 4
