**QUESTION 1**

Corporate users require a solution that permits a complete separation of corporate and personal email, that is encrypted by 256-bit encryption, and that can be secured if a device is stolen.

Which VMware product can provide this functionality?

- A. AirWatch Inbox
- B. AirWatch Workspace
- C. AirWatch Browser
- D. AirWatch Secure Content Locker Collaboration

Correct Answer: C

---

**QUESTION 2**

An administrator wants to deploy application pools, but the company is concerned about securing and managing them. How do application pools overcome the company's concerns?

- A. Applications are presented the same way on different devices.
- B. Applications can be installed locally.
- C. Applications are stored centrally in the data center.
- D. Applications are dedicated for each user.

Correct Answer: B

---

**QUESTION 3**

Several users of a desktop pool are complaining of slow login performance. How can Persona Management improve the pool's performance?

- A. By allowing the VMware administrator to store all user documents and settings directly to a VMFS datastore.
- B. By downloading the user's settings and desktop on demand, rather than downloading the entire configuration at logon.
- C. By frequently saving used files to a local SSD device to improve read performance.
- D. By allowing the user to store their desktop and settings to a USB device to improve recovery.

Correct Answer: B

---

**QUESTION 4**

A company wants to deploy VMware Workspace Portal in its environment, but is concerned that users will be able use unauthorized applications. Which mechanism of VMware Workspace Portal prevents this behavior?

- A. Authorized user credentials are detected from Active Directory.
- B. Unauthorized access to applications is detected and the administrator is notified.
- C. User attributes are detected and policies are enforced across applications.
- D. Access to applications by default is not allowed. Each user must request access via the interface.

Correct Answer: C

---

#### QUESTION 5

A medium sized company manages over 1,000 virtual machines, which are running on six ESXi hosts in a VMware Horizon 6 infrastructure.

The existing storage array is suffering from performance and capacity issues. The company is considering deploying a new storage array, but is concerned about the cost.

Which VMware solution offers a software-defined storage platform that is fully integrated with vSphere and can be deployed without the need for an external storage array?

- A. iSCSI
- B. Fibre Channel over Ethernet
- C. Virtual SAN
- D. VMFS

Correct Answer: B
