- B. Deploy the ThinApp application using VMware Workspace Portal
- C. Deploy the ThinApp application using Microsoft Group Policies.
- D. Deploy the ThinApp application using VMware Update Manager.

Correct Answer: BD

---

**QUESTION 2**

Which statement represents a significant advantage of using vRealize Operations for Horizon 6?

- A. The administrator's monitoring window flashes with a colored surround immediately an issue or problem occurs in their virtualized environment.
- B. Performance issues and problems appear as color coded pop-ups on an administrator's management window.
- C. Administrators can receive color coded emails indicating the severity of issues or problems in their virtualized data centre.
- D. Smart alerts are generated when performance data of monitored objects deviates from acceptable norms, or when a problem occurs.

Correct Answer: B

---

**QUESTION 3**

Which technique does VMware vRealize Operations for Horizon 6 use to determine the upper and lower range of normal behavior for each metric?

- A. Pro-Active Smart Alerts
- B. Super Metrics
- C. Dynamic Thresholding
- D. Self Learning Analytics

Correct Answer: C

---

**QUESTION 4**

Several users of a desktop pool are complaining of slow login performance. How can Persona Management improve the pool's performance?

- A. By allowing the VMware administrator to store all user documents and settings directly to a VMFS datastore.
- B. By downloading the user's settings and desktop on demand, rather than downloading the entire configuration at logon.
- C. By frequently saving used files to a local SSD device to improve read performance.
- D. By allowing the user to store their desktop and settings to a USB device to improve recovery.

Correct Answer: B

---

#### QUESTION 5
