### QUESTION 1

Which XenMobile Windows Phone 8.1 policy should a Citrix Engineer configure in order to deploy Worx MDX apps to a Windows Phone 8.1 device?

- A. Enterprise Hub policy
- B. Exchange policy
- C. App Inventory policy
- D. Sideload Key policy

Correct Answer: A

---

### QUESTION 2

Scenario: A Citrix Engineer uses the Netscaler XenMobile wizard to configure SSL Offload for a single XenMobile Server and selects the http communication to XenMobile Server under Mobile Application Management (MAM) load balancing settings. After completing the wizard, the engineer runs the Load Balancer for MAM connectivity check, which shows a failure.

Which corrective step will the engineer need to take to ensure successful communications between the XenMobile Server and NetScaler?

- A. Add the CITRIX-XDM monitor to the load-balancing virtual server.
- B. Add the NetScaler SNIP to the Access-white list on the XenMobile Server.
- C. Allow the http service through the XenMobile Server firewall.
- D. Upload the XenMobile Server root certificate to the NetScaler.

Correct Answer: C

---

### QUESTION 3

Scenario: A Citrix Engineer is experiencing issues deploying client certificates for NetScaler Gateway authentication to devices after configuring their Public Key Infrastructure (PKI) settings within the XenMobile Server.

Which two sets of logs could the engineer review to determine why the certificate is NOT being issued? (Choose two.)

- A. Worx Home logs
- B. XenMobile Server Debug Log File
- C. Certificate Authority Event Viewer
- D. NetScaler aaad.debug log

Correct Answer: BC

---

#### QUESTION 4

Worx Home is installed on organization-wide Android and iOS devices.

Which two tasks must a Citrix Engineer perform to ensure organization-wide devices successfully enroll with XenMobile Device Manager? (Choose two.)

- A. Request an APNS certificate for iOS devices.
- B. Open ports 80 and 443 on the external firewall.
- C. Configure XenMobile Device Manager to push a device inventory policy.
- D. Open outbound connections to APNS through ports 2195 and 2196 for the XenMobile Device Manager.

Correct Answer: AD

---

#### QUESTION 5

Scenario: A Citrix Engineer needs to provide access from WorxWeb to internal corporate HTTP websites through an internal proxy server. The engineer has configured Single Sign- On to web applications on the NetScaler.

What are two ways that the engineer could ensure that users are able to access the websites without being prompted to authenticate more than once? (Choose two.)

- A. Disable Secure browse mode in the NetScaler session policy.
- B. Set WorxWeb Network access to "Tunneled to internal network".
- C. Set WorxWeb VPN mode to "Secure browse".
- D. Add the website to the allowed website list for WorxWeb.

Correct Answer: BC
