QUESTION 1

Which two XenMobile applications could be upgraded by a Citrix Engineer? (Choose two.)

- A. MDX applications
- B. Web and SaaS applications
- C. Public app store applications
- D. Enterprise applications
- E. Web link applications

Correct Answer: AD

QUESTION 2

Scenario: A Citrix Engineer needs to deploy a XenMobile solution for a large organization. The organization will use XenMobile to manage Android and iOS devices.

To provide resilience, NetScaler appliances will communicate with XenMobile Servers. The engineer has deployed all necessary infrastructure and opened the required firewall ports. To load balance mobile device management traffic, the engineer has configured NetScaler to use SSL_Bridge to communicate with a XenMobile Server cluster.

Which persistence method should the engineer configure to facilitate consistent communication between the NetScaler and the XenMobile Servers?

- A. SSLSESSION
- B. CUSTOMSERVERID
- C. DESTIP
- D. COOKIEINSERT

Correct Answer: A

QUESTION 3

Scenario: A Citrix Engineer wants to configure a NetScaler Gateway with two-factor authentication within a new XenMobile deployment while providing users with the benefits of single sign-on to the existing XenApp and XenDesktop resources. The engineer configured a Public Key Infrastructure (PKI) for other components in the environment already and would like to use the same PKI.

Which two types of authentication policies will the engineer need to add to the NetScaler Gateway virtual server? (Choose two.)

- A. LDAP
- B. Certificate

C. Radius

D. TACACS

Correct Answer: AB

QUESTION 4

What would cause a subset of iOS users in the same security group to NOT be provisioned to ShareFile?

A. Users have NOT logged on to Worx Home.

B. Users have NOT launched the ShareFile app.

C. The administrator has NOT provisioned the user from the User Management Tool.

D. The administrator has NOT enabled the user provisioning setting within the ShareFile settings.

Correct Answer: A

QUESTION 5

Scenario: A user has lost permission to WorxMail and the application has been uninstalled. However, the user can still access the Worx Store. Which two sets of logs should a Citrix Engineer gather in order to help diagnose this issue? (Choose two.)

A. XenMobile Server log

B. NetScaler log

C. WorxMail log

D. Worx Home log

Correct Answer: AD
