QUESTION 1

Which two parameters must be set to configure the fast recovery area? (Choose two.)

- A. DB CREATE FILE DEST
- B. DB_RECOVERY_FILE_DEST
- C. DB_RECOVERY_FILE_DEST_SIZE
- D. LOG_ARCHIVE_DEST
- E. at least two locations using DB_CREATE_ONLINE_LOG_DEST_n
- F. DB FLASHBACK RETENTION TARGET

Correct Answer: BC

QUESTION 2

Your multitenant container database (CDB) contains multiple pluggable databases (PDBs). You execute the command to create a common user:

SQL> CREATE USER c##a_admin IDENTIFIED BY password DEFAULT TABLESPACE users QUOTA 100M ON users TEMPORARY TABLESPACE temp;

Which statement is true about the execution of the command?

- A. The common user is created in the CDB and all the PDBs, and uses the users and temp tablespaces of the CDB to store schema objects.
- B. The command succeeds only if all the PDBs have the USERS and TEMP tablespaces.
- C. The command gives an error because the CONTAINER=ALL clause is missing.
- D. The command succeeds and sets the default permanent tablespace of a PDB as the default tablespace for the C##A_ADMIN user if the USERS tablespace does not exist in that PDB.

Correct Answer: B

QUESTION 3

Your database supports a Decision Support System (DSS) workload that involves the execution of complex queries. Currently, the database is running with peak workload. You want to analyze some of the most resource-intensive statements cached in the library cache.

What must you run to receive recommendations on the efficient use of indexes and materialized views to improve query performance?

- A. SQL Performance Analyzer
- B. SQL Access Advisor
- C. SQL Tuning Advisor
- D. Automatic Workload Repository (AWR) report
- E. Automatic Database Diagnostic Monitor (ADDM)

Correct Answer: B

Reference: http://docs.oracle.com/cd/B28359_01/server.111/b28275/tdppt_sqltune.htm#TDPPT160 (4th para)

QUESTION 4

The environmental variable oracle_Base is set to /u01/app/oracle and oracle_home is set to /u01/app/oracle/product/12.1.0/db 1.

You want to check the diagnostic files created as part of the Automatic Diagnostic Repository (ADR). Examine the initialization parameters set in your database.

NAME TYPE VALUE

audit_file_dest string /u01/app/oracle/admin/eml2rep/adump background_dump_dest string core_dump_dest string db_create_file_dest string db_recovery_file_dest string /u01/app/oracle/fast_recovery_area diagnostic_dest string

What is the location of the ADR base?

- A. It is set to /u01/app/oracle/product:/12.1.0/db_1/log.
- B. It is set to /u01/app/oracle/admin/enl2randp/adump.
- C. It is set to /u01/app/oracle.
- D. It is set to /u01/app/oracle/flash_recovery_area.

Correct Answer: C

http://docs.oracle.com/cd/B28359_01/server.111/b28310/diag001.htm#ADMIN11008

The Automatic Diagnostic Repository (ADR) is a directory structure that is stored outside of the database.

It is therefore available for problem diagnosis when the database is down. The ADR root directory is known

as ADR base. Its location is set by the DIAGNOSTIC_DEST initialization parameter. If this parameter is

omitted or left null, the database sets DIAGNOSTIC_DEST upon startup as follows:

If environment variable ORACLE_BASE is set, DIAGNOSTIC_DEST is set to the directory designated by

ORACLE_BASE.

If environment variable ORACLE_BASE is not set, DIAGNOSTIC_DEST is set to ORACLE_HOME/log.

QUESTION 5

You execute the commands on a multitenant container database CDB1 that has multiple pluggable databases:

```
$ . oraenv
ORACLE_SID = [oracle] ? cdb1
The Oracle base for ORACLE_HOME=/u01/app/oracle/product/12.1.0/dbhome_1 is /u01/app/oracle
$ rman target /

connected to target database: CDB1 (DBID=782249327)
RMAN> SELECT name FROM v$tablespace;
```

Which statement is true about the execution of the last command?

- A. It succeeds and displays all the tablespaces that belong to the root database.
- B. It fails and returns an error because a connection is not made by using the sysdba privilege.
- C. It succeeds and displays all the tablespaces that belong to the root and pluggable databases.
- D. It fails and returns an error because SQL commands cannot be executed at the RMAN prompt.

Correct Answer: C
