**QUESTION 1**

The Oracle database 12c Observer is currently running on host1 and you wish to have it running on host2.

Examine this list of possible steps:

- 1) Stop the observer on host1.
- 2) Disable Fast-Start Failover.
- 3) Update the broker configuration with the new observer hostname.
- 4) Enable Fast-Start Failover.
- 5) Start the Observer on host2.

Which contains the minimum required steps to move the observer to host2?

- A. Execute only task 5.
- B. Execute tasks 1, 3, and 5.
- C. Execute tasks 1, 2, 3, 4, and 5.
- D. Execute tasks 1 and 5.

Correct Answer: D

---

**QUESTION 2**

Which four database parameters might be affected by or influence the creation of standby databases?

- A. DB\_NAME
- B. ARCHIVE\_LAG\_TARGET
- C. COMPATIBLE
- D. DB\_FILE\_NAME\_CONVERT
- E. DB\_UNIQUE\_NAME
- F. FAL\_SERVER
- G. STANDBY\_ARCHIVE\_DEST

Correct Answer: ADEF

---

**QUESTION 3**

Which four requirements can be met by deploying a logical standby database?

- A. Support for workloads requiring additional indexes.
- B. it can be used to create additional schemas.
- C. it can be used to create additional tables.
- D. It must have the same physical structure as the primary database.
- E. it must provide a disaster-recovery solution that protects all data with capability of performing switchovers and failovers.
- F. Support for workloads requiring additional materialized views.
- G. it can be used for Real Application Testing without affecting the disaster recovery capabilities.

Correct Answer: ACEG

---

#### QUESTION 4

You must design an Oracle Data Guard configuration for an OLTP database that meets these permanent requirements:

1.  
Data loss is not permitted.
2.  
Read-only applications should not connect to the primary database instance.

Additionally, there are these requirements, only one of which is ever done at any one time:

1.  
It should be possible to apply designated patches with a minimum amount of downtime.
2.  
Upgrading to a new database release should be performed with the least possible amount of downtime.
3.  
New application software releases should be tested against an exact and up-to-date replica of the primary database.

Which configuration meets these requirements with the fewest databases?

- A. a primary database with three physical standby databases
- B. a primary database with one logical and two physical standby databases
- C. a primary database with one logical standby database
- D. a primary database with one logical and one physical standby database

E. a primary database with two physical standby databases

F. a primary database with one physical standby database

Correct Answer: D

---

#### QUESTION 5

Which two Data Guard features require the use of flashback database by the broker?

A. Read-Mostly physical standby implementations

B. Far Sync Instances

C. Fast-Start Failover

D. Real Time Query

E. Snapshot Standby databases

Correct Answer: CE
