QUESTION 1

Which three of the project DFF attributes can you use to capture additional project information?

- A. Independent
- B. Number of field workers
- C. Internal Project Category
- D. Launch Date
- E. Integer

Correct Answer: BCD

QUESTION 2

Your client uses Resource Breakdown Structures (RBS) and Resource Mapping to associate amounts to resources. After making some changes to the resources at project level, forecasts are regenerated. After reviewing the cost amounts associated with the resources, you suspect that the cost association does not match your client's expectations.

Identify two valid rules based on which cost association works.

- A. If the sum of precedence numbers is the same for more than one branch, precedence is given to the branch with the lowest number at the lowest level.
- B. If there is only one level in RBS to which the transaction maps, the cost amounts are mapped to that level.
- C. If a transaction maps to more than one level, Oracle PPM Cloud sums the precedence numbers for all resource types in the branch, and gives precedence to the resource element in the branch with the highest sum.
- D. If one branch contains a user-defined resource type, precedence is given to the branch that contains a user -defined resource type.

Correct Answer: AD

QUESTION 3

After completing setups in a source environment, your customer wants to move the setup data to a target environment.

Identify the two statements related to task list scope, which you must consider before taking a decision based on the customer requirement.

- A. A scope value is used to assign users who can perform a task within an implementation project.

- B. Exported setup data can be filtered by specific scope values if the business object has scope enabled for the setup data export.
- C. Exported setup data cannot be filtered by specific scope values if the business object has scope enabled for the setup data export.
- D. A task list can be segmented by a scope value and a task can be performed for each qualifying value of the selected object.

Correct Answer: BD

QUESTION 4

Which three features are part of Functional Setup Manager?

- A. modifying an existing implementation project task list by selecting more functional areas when needed
- B. guided task list for end-to-end setup requirements
- C. feature opt-in for a best fit configuration
- D. export and import services for setup data migration between environments
- E. updating an implementation project task list by changing the opt-in configuration to suit the latest requirements

Correct Answer: BCD

QUESTION 5

You have projects and tasks defined with transaction controls, which does not allow certain types of charges to the project. Your business needs to create invoices in AP with this project every period and hence would like to make the process easier by creating a distribution set. As you create the distribution set, you notice that these distribution set lines are not validated against the project transaction controls and you are allowed to save it without any validation errors.

Identify the reason why the project transaction controls are not applied.

- A. There is no expenditure item date information available on the distribution set line.
- B. There is no expenditure organization information available on the distribution set line.
- C. The account code combination is not available on the distribution set line.
- D. There is no expenditure type information available on the distribution set line.

Correct Answer: D
