QUESTION 1

Which two fields are required when adding a new user to the CPQ Cloud site?

- A. Email
- B. Last Name
- C. First Name
- D. Type
- E. Password

Correct Answer: DE

QUESTION 2

A multi-select attribute with five options is displayed as check boxes. Depending on the conditions, the Configurator should show a user three of these five options.

How do you accomplish this?

- A. by writing a Constraint rule
- B. by writing a Hiding rule
- C. by writing a Recommendation rule
- D. by writing a Pricing rule

Correct Answer: B

QUESTION 3

How should an administrator set up a conditional restriction for access to a Product Family?

- A. by providing conditional access criteria in the Restricted Access section of the home page setup
- B. by setting up a restricted profile and user group in Commerce and hiding the add, reconfigure, and delete product options
- C. by hiding the model Punch-In on the home page by using JavaScript
- D. by writing a Constraint rule at the Product Family level

Correct Answer: A

QUESTION 4

Which statement is a proper definition of a Punch-In?

- A. Punch-Ins are links that hook into a specific Commerce process in the system. They can be used to navigate directly to a given Commerce process in your application. They can also be used to jump into a specific Commerce process from an external website.
- B. Punch-Ins are links that hook into specific product families in the system. They can be used to navigate directly from a product family to another in your application. They can also be used to jump into a specific product family from an external website.
- C. Punch-Ins are links that relate into specific parts in the system. They can be used to search directly for a given part in your application. They can also be used to search for a specific part from an external website.
- D. Punch-Ins are links that hook into specific pages in the system. They can be used to navigate directly from one page to another in your application. They can also be used to jump to a specific page from an external website.
- E. Punch-Ins are buttons that take you to specific pages in the system. They can be used to navigate directly from one page to another in your application.

Correct Answer: D
