QUESTION 1

You need to display a message to a logged in shopper about a relevant promotion, based on the number of products in the cart and the total value of the items. You develop a custom widget that uses the User, Cart and Site view models as displayed in this example Javascipt:

```
function (ko) {
    ...
    widget.showCartMsg = ko.computed(function() {
      return (widget.user().loggedIn() &&
            widget.cart().numberOfItems() > 0 &&
            widget.cart().subTotal() < minSpend);
    });
    widget.cartMsg = ko.computed(function() {
      return widget.translate('cartMsg',
      {currencySymbol: widget.site().currency.symbol,
      cartTotal: widget.cart().subTotal(), minSpend: minSpend,
      coupon: coupon});
    });
    ...
}
```

Under what condition is the showCartMsg() function true?

A. Only when there is at least one item in the cart and the cat subtotal is less than the value of minSpend

B. When a user is logged in and there is at least one item in the cart and the cart subtotal is less than the value of minSpend

C. If either a user is logged in or there is at least one item in the cart or the cart subtotal is less than the value of minSpend

D. As long as the user is logged in; the status of the cart does not matter

Correct Answer: C

QUESTION 2

In the Commerce Cloud implementation of the Model-View-ViewModel architecture pattern, what does the View represent?

A. Widget localization string resources

B. Widget HTML template

C. Widget JavaScript

D. Store data, encapsulated in JSON

Correct Answer: B

QUESTION 3

What three tasks, if implemented, can a contact with the storefront role of Administrator perform on a B2B Storefront? (Choose three.)

A. Set product pricing discounts for the Account contract per site

B. Create, edit, and delete contacts

C. Specify an order approval threshold value

D. Approve or reject a registration request for a contact

E. Approve or reject an order that requires approval

Correct Answer: ACE

QUESTION 4

A company has many anonymous shoppers who pay for orders with split payments. In their prior system, they ran into issues when one of the payment methods failed and the order was in a pending state waiting for the rest of the payment. In those cases, the shoppers could not retrieve the orders when they returned to the site because they did not have access to the order number?

The company plans to configure Commerce Cloud to avoid this situation where the anonymous shopper does not know the order ID.

What step can the company take in Commerce Cloud to avoid this happening?

A. No default configurations exist to help with this problem. This can only be handled in the custom payment integration system.

B. Enable the Order Placed Email to send the order ID when the payment goes through.

C. Select the Payment Settings option to notify anonymous shoppers of partial payment

D. Enable the Order Payment Initiated Email to send the order ID when the order is created

Correct Answer: B

QUESTION 5

What is the Commerce Cloud ccResizeImage custom binding used for?

A. update image borders and colors before download

B. size image to the current viewport before it is downloaded

C. alter image proportions after download so that it fits on the screen

D. crop the image based on specified top, bottom, left and right parameters

Correct Answer: B
