QUESTION 1

When configuring sites, you have two properties related to price groups: the default price group and additional price groups. Consider the following scenario:

Site US has the US Dollar price group set as its default price group.

Site Canada has the Canadian Dollar price group as its default price group, but needs a second price group for US dollars.

It can either share the US Dollar price group with Site US or have a separate US Dollars2 price group.

Under what condition should Site Canada use the separate US Dollars2 as its additional price group?

- A. The two countries have different sales tax rate calculations
- B. Reports in Oracle Business Intelligence Enterprise Edition need to separate sales totals in US dollars by site
- C. Site Canada has two languages and two currencies, and therefore needs dedicated price groups to accurately display prices
- D. US dollar prices differ between Site US and Site Canada

Correct Answer: A

QUESTION 2

The following code snippet shows the customProperties subobject included in the payments object in the payments object in a sample JSON request payload:

```
"payments": [  
  {  
    ...  
    "customProperties" : {  
      "MonthlyCharge" : "$25",  
      "NumberOfPayments" : "12"  
    }  
    ...  
  }  
]
```

Which two statements describe how the custom properties were included in the request? (Choose two.)

- A. Custom properties can be added via a custom widget
- B. Custom properties are included in the gateway extension's JavaScript

- C. Custom properties are specified in the config.json file for the gateway extension
- D. Custom properties are specified in the createOrder REST request

Correct Answer: CD

QUESTION 3

A company has two sites. Site A is the default site and has English as the default language and German as an additional language. Site B has German as the default language. The company needs to provide metadata in both languages. After creating the products in English, which action can the company take to have metadata in both German and English?

- A. On the Metadata tab, add the German translations in addition to the English metadata
- B. On the Metadata tab, overwrite the English metadata with the German translations
- C. Create a duplicate set of the products and collections in German
- D. Switch to Site B to add the German translations for product and collection names and descriptions
- E. Select German as the content language and enter the German translations for product and collection names and descriptions

Correct Answer: A

QUESTION 4

What is the Commerce Cloud ccResizeImage custom binding used for?

- A. update image borders and colors before download
- B. size image to the current viewport before it is downloaded
- C. alter image proportions after download so that it fits on the screen
- D. crop the image based on specified top, bottom, left and right parameters

Correct Answer: B

QUESTION 5

Consider the following code snippet from the config.json file for a custom payment gateway extension's properties:

```
"properties": [
  {
    "id": "paymentMethodTypes",
    "type": "multiSelectOptionType",
    "name": "paymentMethodTypes",
    "required": false,
    "helpTextResourceId": "paymentMethodsHelpText",
    "labelResourceId": "paymentMethodsLabel",
    "defaultValue": "generic",
    "displayAsCheckboxes": true,
    "options": [
      {
        "id": "generic",
        "value": "generic",
        "labelResourceId": "genericLabel"
      },
    ],
  }
]
```

Which two statements describe the paymentMethodTypes property configuration? (Choose two.)

- A. The generic option will appear as a checkbox in the Administration UI
- B. The default value is set to generic, which means that option will be selected in the Administration UI
- C. Other paymentMethodTypes options defined in the gateway.json file will appear in the Administration UI, even though not explicitly defined in config.json
- D. The property is public by default and can be used in a custom widget

Correct Answer: CD
