QUESTION 1

Which data CANNOT be captured by running out-of-the box operational or historical reports in Oracle Identity Cloud Service?

- A. How many times user signed in to Oracle Identity Cloud Service
- B. Users who either have signed in to Oracle Identity Cloud Service or who couldn't sign in to Oracle Identity Cloud Service
- C. Users who use rogue accounts to sign in to Oracle Identity Cloud Service
- D. Users who have been assigned to and removed from Oracle Identity Cloud Service administrator roles

Correct Answer: D

QUESTION 2

You want to configure Oracle Identity Cloud Service so that any users who use an IP address that comes from a country where hacking is rampant are prevented from accessing Oracle Identity Cloud Service.

How would you accomplish this?

- A. Define a network perimeter, assign it to a rule of a sign-on policy, and set the access for the rule to be denied.
- B. Define a network perimeter, assign it to a rule of a sign-on policy, set the access for the rule to be denied, and define risk-related conditions in the rule associated with the user's location.
- C. Define a network perimeter and assign it to a rule of a sign-on policy.
- D. Define a network perimeter.

Correct Answer: A

QUESTION 3

Can you customize which of your identity providers appear on the Sign In page when users are accessing Oracle Identity Cloud Service either locally or through a specific app?

- A. No, because users should always sign in using their local authentication credentials.
- B. Yes, by using identity provider policies.
- C. Yes, by using sign-on policies.
- D. No, because any identity provider that's set to appear in the Sign In page will be displayed.

Correct Answer: B

QUESTION 4

In your organization you are planning to implement Oracle Identity SOC as a cloud security solution. What are two reasons for using an Identity SOC Solution? (Choose two.)

- A. It incorporates the threat intelligence feeds from IP blacklists and known vulnerable databases only.
- B. It uses adaptive ML-based analytics with identity.
- C. It provides the ability to have a hybrid enterprise application solution.
- D. It provides multiple tools for data operations.

Correct Answer: AB

QUESTION 5

In your organization you want to decrease manual intervention for remediation of the large number of security alerts generated from the number of security products deployed against each other. Which solution would solve the problem?

- A. Oracle Configuration and Compliance Cloud Service
- B. Oracle Data Integration Platform Cloud Service
- C. Oracle Identity Security Operations Center (SOC) solution
- D. Oracle Integration Cloud Service

Correct Answer: C
