**QUESTION 1**

Available to promise rules are \_\_\_\_\_.

- A. Seeded using APICS conventions
- B. User defined in order management module
- C. User defined using a matrix of selectable criteria
- D. User defined in the global order promising module
- E. System assigned base upon the item type, cumulative lead time and un consumed forecast

Correct Answer: C

---

**QUESTION 2**

Identify two tasks that are used to set up statuses in the orchestration process configuration in the Functional Setup Manager. (Choose two.)

- A. Manage Orchestration Status Values
- B. Manage Task Status Condition
- C. Manage Status Values
- D. Manage Orchestration Status

Correct Answer: BD

---

**QUESTION 3**

Your company wants to default the preferred fulfillment warehouse and scheduled ship date as order requested date during order import and skip the scheduling task for a particular order type.

What are the two business rules that must be configured to achieve this requirement? (Choose two.)

- A. Define a branching condition rule.
- B. Define a lead time expression rule.
- C. Define a line selection criteria rule for the scheduling task.
- D. Define a compensation pattern rule.
- E. Define a pre-transformation defaulting rule.

Correct Answer: CE

---

#### QUESTION 4

Identify the Order Management configuration setup that must be performed by a system administrator in order to define an external source system connector.

- A. The source system needs to be called by using the web service from Cloud Order Management.
- B. The source systems link needs to be registered in Manage Web Service.
- C. The connector service needs to be registered by using Manage Web Service.
- D. The source system needs to be registered in Manage Web Service.

Correct Answer: C

---

#### QUESTION 5

What is the configuration required to automatically calculate the Jeopardy Score and priority when an orchestration process is planned or re-planned?

- A. Schedule the process refresh and start the order promising server.
- B. Check the change mode parameter to Advanced on the orchestration process.
- C. Schedule the process plan orchestration processes.
- D. Check the Replan Instantly parameter in the orchestration process.

Correct Answer: D

You can enable the Replan Instantly feature when you define an orchestration process. It replans the orchestration process immediately after this process completes the orchestration process step, and then displays the revised order data according to the replanning work that it does. It is recommended that you use Replan Instantly only for high priority sales orders, or with sales orders that include a jeopardy threshold of less than one day. For performance reasons, it is recommended that you do not use it with an orchestration process step that is long or complex. If Replan Instantly does not contain a check mark, then Order Management updates the planning data only during the scheduled replanning.
