QUESTION 4

In which fulfillment process does a specific sales order demand trigger a supply creation, and a firm link is established between the sales order and the supply?

- A. Consignment order
- B. Internal Transfer
- C. Configure to order
- D. Back-to-back
- E. Drop Ship

Correct Answer: D

The back-to-back fulfillment process is one in which specific sales order demand triggers supply creation, and a link is established between the sales order and the supply.

QUESTION 5

Your company wants to define different status conditions for fulfillment lines that have different categories assigned to a single orchestration process in Order Management Cloud.

Which two configurations would you perform to meet this requirement? (Choose two.)

- A. Define a fulfillment line status rule set for each category.
- B. Create a unique step for each category and assign different "next expected task statuses."
- C. Define orchestration process status values for each category.
- D. Assign the status catalog to the orchestration process.

Correct Answer: CD

An orchestration process is a predefined business process that coordinates the orchestration of physical goods and activities within a single order and automates order orchestration across fulfillment systems.
