### QUESTION 1

When you manually create a binding such as an attribute value binding, what name would you give to the binding? (Choose the best answer.)

- A. a name that reflects the UI component to which it is bound
- B. the page name suffixed with the UI component name to which it is bound
- C. the page name suffixed with the data control name
- D. the name of the data control attribute to which the binding refers
- E. an EL (Expression Language) of the form `#{bindmgs value}`

Correct Answer: B

---

### QUESTION 2

Which two statements describe the characteristics of an application module? (Choose two) A. ft provides the database transaction for the queries that it encapsulates.

- B. it defines view object instances to implement an application use case.
- C. it defines entity object instances to implement an application use case.
- D. There is a one-to-one mapping between view objects and application modules.
- E. Each ADF application has only one application module.

Correct Answer: AB

---

### QUESTION 3

Consider a case where an application does not respond as predicted when a user submits data. Where would you set a breakpoint to debug the issue? (Choose the best answer)

- A. the value binding for the iterator on the pagedef for the view
- B. a view activity that is used to determine where to send the user
- C. the partialTriggers property of the data bound component in the view
- D. the Apply Request Values phase of the life cycle

Correct Answer: A

---

### QUESTION 4

You have three application modules: A, B, and C. Application modules B and C are nested under the root application module A. Which statement is true when committing the nested application module B? (Choose the best answer.)

- A. No view objects are committed
- B. Only changes to view objects exposed through application module B are committed
- C. Only changes to view objects exposed through application modules A and B are committed
- D. All changes to all view objects exposed through all application modules A, B, and C are committed.

Correct Answer: C

---

#### QUESTION 5

Which two statements are true about a `dvt:gauge` component? (Choose two.)

- A. `dvthresholdSet` with `dvthreshold` tags can be used to define ranges of data and coloring for a gauge
- B. The style of the dial in a dial gauge is fixed
- C. A gauge component can render as a vertical status meter.
- D. Gauge data range must start from 0.

Correct Answer: AC
