QUESTION 1

Which two statements are correct regarding the Oracle Enterprise Deployment Guide document for WebCenter Portal?

A. Deployment includes a Load balancer, Database, Oracle HTTP Servers, an SSO solution, external LDAP credential and policy store, clustered WebCenter Portal, WebCenter Content, and a SOA solution.

B. Deployment can include all of the above except that the credential store may be XML file based to save on system resources.

C. The components use an RAC database to allow consistent data across all of them.

D. A supported web tier is optional because a load balancer can be used to distribute the requests to the corresponding servers directly.

Correct Answer: AD

QUESTION 2

You have to deploy a WSRP producer application for High Availability. Why should you add this setting to

the weblogic.xml file? /appname REPLICATED_IF_CLUSTERED

A. to enable support for replicating HTTP session state

B. to enable ADF Controller to track changes to ADF memory scopes and replicate the page flow scope and view scope within the server cluster

C. to enable ADF Business Components failover

D. to enable ADF object replication

Correct Answer: C

QUESTION 3

After a task flow has been deployed as a new shared library, which step is required in the portal extension project to make this task flow visible from WebCenter Portal?

A. Update only weblogic.xml.

B. Update only MANIFEST.MF.

C. Update both files.

D. None, because a shared library is used.

Correct Answer: C

QUESTION 4

What two are prerequisites for OBIEE and WebCenter Portal (WCP) integration?

A. SSO is configured.

B. Common user names must be present in OBIEE and WCP.

C. The data source for the OBIEE schema must be configured on the WCP domain.

D. The deployment of WebLogic Server must be shared.

E. MBean for the SOAP connection to the BI server is configured.

F. JMS queue for BI report update events on the WCP domain is configured.

Correct Answer: BE

QUESTION 5

Which two methods can you use to create a two-level hierarchy in a portal navigation?

A. Create subpages in the Portal Page Editor.

B. Adjust the portal navigation manually by moving pages as desired.

C. Use a Master-Detail relationship.

D. Leverage the "level" attribute in the pageTemplate tag.

Correct Answer: AC
