QUESTION 1

How should the stated service-oriented Integration architecture principles be applied at an organization?

A. All of the architecture principles must be followed. If any of the principles are violated, the architecture is not service oriented.

B. The organization should review and evaluate the architecture principles, and then derive their own architecture principles that match their specific environment and goals.

C. An organization can add additional architecture principles, but the stated architecture principles must be followed.

D. An organization can decide to not enforce one or more of the architecture principles, but additional architecture principles will not be needed.

E. The architecture principles define what products will be used in the architecture, so the architecture principles must be adjusted to reflect the chosen products.

Correct Answer: B

QUESTION 2

A successful SOA initiative is built on a solid SOA governance foundation. What three statements are true when referring to a SOA Governance model?

A. There is one standardized SOA governance model that is appropriate for all enterprises.

B. There is no single model of good SOA governance because each enterprise has differences andnuances.

C. A SOA governance model focuses only on the lifecycle of a Service.

D. Compliance with a defined SOA governance model Is automatic after It has been deployed.

E. A SOA governance model enables the definition of policies andprocesses to guide management into making effective SOA decisions.

F. A SOA governance model enables authorized groups to encourage/enforce alignment to SOA architecture and cultural orientation.

Correct Answer: DEF

QUESTION 3

Which role is critical in promoting the discovery and reuse of SOA Services and supporting the service lifecycle?

A. Service Development Platform

B. Service Bus

C. Metadata Repository

D. Service Registry

Correct Answer: B

QUESTION 4

You receive requirements for a business Service which specifies that the Service must guarantee delivery of messages in the presence of component, system, or network failure. Which option best describes how you would design the Service?

A. Service writes message to a fault tolerant database from which the consumer can read the message.

B. Use WS-ReliableMessaging to support a delivery-based QoS for messages.

C. Service posts a message on a database-backed JMS Queue from which the consumer can read the message.

D. Use WS-Policy and WS-Security to support guaranteed delivery-based quality of service.

Correct Answer: B

QUESTION 5

One of the goals of your newly formed SOA initiative is to speed up time to market for new and updated functionality. Which option best supports your goal?

A. Utilize Service composition to reuse and combine existing Services to form new more course grained functionality.

B. Utilize a common data model across all Services so that no data transformation is required when Services are reused.

C. Only deploy SOA Governance when you have 50 or more Services.

D. Utilize REST Services over SOAP-based Services because they are quicker to develop.

Correct Answer: A
