### QUESTION 1

Which two statements about Global Data Services (GDS) are correct?

- A. GDS allows scaling replication-aware application workloads beyond the cluster (that is, across replicated clusters).
- B. GDS helps in performing data replication.
- C. GDS works seamlessly with any combination of Oracle RAC databases, single-instance databases, Oracle Data Guard, Oracle Active Data Guard, and Oracle Golden Gate.
- D. GDS helps to perform database failovers, and does not require Data Guard Broker.
- E. The GDSMGRL utility is a command-line interface for configuring and managing the Global Data Services framework.

Correct Answer: AC

---

### QUESTION 2

Identify three key properties of a transaction in Oracle Database 12c.

- A. durability
- B. consistency
- C. concurrency
- D. isolation
- E. scalability
- F. manageability

Correct Answer: ABD

### QUESTION 3

Which three options correctly match environment variables with their specific functionality?

- A. ORACLE\_SID specifies the instance name.
- B. ORACLE\_SID specifies the global database name.
- C. ORACLE\_BASE specifies the root of the Oracle Database directory tree in all platforms.
- D. ORACLE\_BASE specifies the root of the Oracle Database directory tree only in UNIX and Linux platforms.

E. ORACLE\_HOME specifies the directory containing the Oracle software executables and network files.

F. ORACLE\_HOME specifies the directory containing only the Oracle software executables, but not the network files.

Correct Answer: ACE

---

#### QUESTION 4

Which type of file system is NOT valid for storing data files, online redo log files, and control files for a pluggable database?

A. Automatic Storage Management (ASM)

B. OS file system

C. logical volume (LVM)

D. clustered file system

E. RAW

Correct Answer: E

---

#### QUESTION 5

Which two statements about multi section backup are true?

A. It is available only for full backups.

B. It supports incremental backups and image copies.

C. Backup for each data file is divided into sections and is backed up in parallel. However, for image copies, sections are backed up sequentially.

D. For image copies, sections are backed up in parallel and recomposed at the end.

Correct Answer: BD

B (Not A): Starting with Oracle Database 12c Release 1 (12.1), RMAN supports multisection incremental backups D (not C): Starting with Oracle Database 12c Release 1 (12.1), you can create multisection full backups that are stored as image copies. While the image copy is being created, multiple channels are used to write files sections. However, the output of this operation is one copy for each data file.
