QUESTION 1

Your customer wants to transfer material from facility A to facility B. They are using the interorganization transfer to perform the transaction in the system. Their requirement is "whenever material is transferred from their facility A to facility B, facility B needs to pay 5% additional amount to the current item cost".

Which task must be set up to accomplish this requirement?

- A. Manage Interorganization Markup
- B. Manage Transfer Pricing Rules
- C. Manage Cost Plus Pricing
- D. Manage Cost Organization Relationships
- E. Manage Organization Relationships

Correct Answer: D

QUESTION 2

You are working with JMS publish-subscribe operations.

What happens when a producer publishes a message to a topic for which a durable subscription exists but there are no subscribers available?

- A. The publisher waits for a subscriber, who then consumes it. However, the publisher will time out if no consumer arrives within the given timeout period.
- B. The publisher sends the message. However, it is never consumed because there wasn't anything listening when it arrived, regardless of the message timeout length.
- C. The publisher successfully sends a message, which will be consumed later, once there is a subscriber, assuming the message hasn't timed out.
- D. The message publisher is immediately notified about the lack of subscribers and can decide for itself if, and when, to resend.

Correct Answer: C

QUESTION 3

Your customer wants to prevent customer shipments out of a specific subventory. They are setting up a material status to control this.

Which transaction do they need to disallow?

- A. Sales Order Pick
- B. Sales Order Issue
- C. Ship Confirm
- D. Miscellaneous Issue
- E. Move Request Putaway.

Correct Answer: B

QUESTION 4

Which code snippet prints the exception error message as part of the page output?

- A.
- B.
- C.
- D.

Correct Answer: D

QUESTION 5

Your customer wants you to restrict the values of Receivables Transaction Type for their three business units. You created three reference data sets for each business unit. However, the user is still able to see the values in the Transaction Type list of values which are not defined in the business unit data set.

What is the reason for this behavior?

- A. The user is seeing the values defined in the common set. The values should be removed from the common set.
- B. Receivables Transaction Types are common across business units.
- C. Reference Data Sets cannot be used uniquely across business units. They can only be used at the Legal Entity level.
- D. The user has multiple Business Unit Roles and, therefore, is able to see additional values.

Correct Answer: A
