Oracle Autonomous Database Cloud 2022 Professional

Pass Oracle 1Z0-931-22 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

https://www.pass2lead.com/1z0-931-22.html

100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by Oracle Official Exam Center

⚙ **Instant Download** After Purchase

⚙ **100% Money Back** Guarantee

⚙ **365 Days** Free Update

⚙ **800,000+** Satisfied Customers

QUESTION 1

Which statement isFALSE for Oracle Data Safe? (Choose the best answer.)

A. Oracle Data Safe helps you assess the security of your cloud database configurations by analyzing database configurations

B. Oracle Data Safe evaluates user types, how users are authenticated, and the password policies assigned to each user

C. Oracle Data Safe only supports Autonomous Databases

D. Oracle Data Safe helps you find sensitive data in your database by inspecting the actual data in your database and its data dictionary

Correct Answer: C

QUESTION 2

AUTONOMOUS DATABASE SERVICES

The underlying converged database capabilities of the Oracle Database enable the Autonomous Database to be offered in two editions that are specifically tailored to a workload following Oracle's Best Practice recommendations. Oracle Autonomous Data Warehouse (ADW) is tailored to Data Warehousing, Data Marts, Data Lakes, and Machine Learning workloads. Oracle Autonomous Transaction Processing (ATP) is tailored to On-Line Transaction Processing, Batch, reporting, IoT, application development, machine learning, and mixed workload environments.
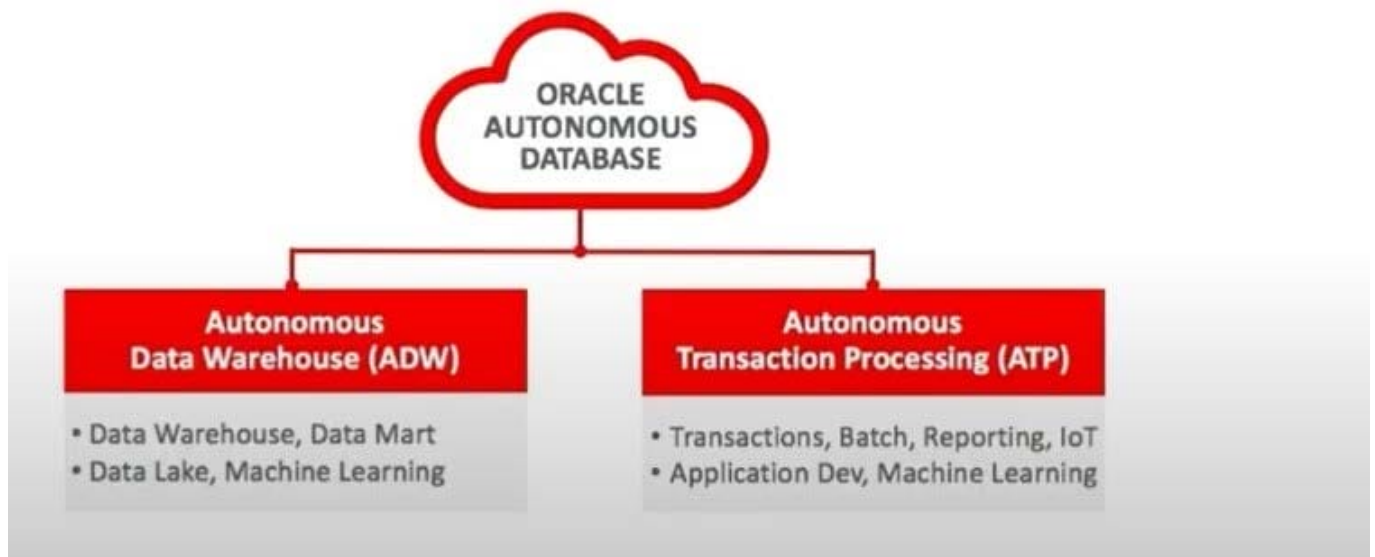

In which four ways can Oracle Database optimally access data in Object Storage?

A. optimized data archive using partitioned external tables

B. optimized data archive using hybrid partitioned tables

![Pass2Lead](https://Pass2Lead.com)
C. scan avoidance using block skipping when reading parquet and ore files

D. scan avoidance using columnar pruning for columnar stores like parquet and orc

E. scan avoidance using partitioned external tables

F. scan avoidance using columnar pruning for .csv files

Correct Answer: ABDE

QUESTION 3

Which cloud service is NOT supported to import data pump files from using Dedicated Exadata Infrastructure?

A. Oracle Cloud Infrastructure Object Storage

B. Google Cloud Storage

C. Amazon S3

D. Oracle Cloud Infrastructure Object Storage Classic

Correct Answer: B

QUESTION 4

An Autonomous Database (ADB) user with an instance wallet has left the company and they shared a database user id with other users when accessing ADB.

Other than changing the shared user password, what can the admin do to protect the instance?

A. Trust the user who left to not access the database.

B. Shutdown and restart the instance.

C. Rotate the instance wallet and share the new wallet with the remaining users.

D. Delete the user.

Correct Answer: C

![Pass2Lead](https://Pass2Lead.com)
Rotate Wallets for Autonomous Database

< >

Wallet rotation lets you invalidate existing client certification keys for a database instance or for all Autonomous Database instances in a region.

You may want to rotate wallets for any of the following reasons:

- If your organization's policies require regular client certification key rotation.
- When a client certification key or a set of keys is suspected to be compromised.

There are two options for client certification key rotation:

- Per-database with **Instance Wallet** selected:
  - For the database whose certification key is rotated, any existing database specific instance wallets will be void. After you rotate a wallet you have to download a new wallet to connect to the database.
  - Regional wallets containing all database certification keys continue to work.
  - All user sessions are terminated for the database whose wallet is rotated. User session termination begins after wallet rotation completes, however this process does not happen immediately.
- Regional level with **Regional Wallet** selected:
  - For the region whose certification key is rotated, both regional and database specific instance wallets will be void. After you rotate a wallet you have to download new regional or instance wallets to connect to any database in the region.
  - All user sessions are terminated for the databases in the region whose wallet is rotated. User session termination begins after wallet rotation completes, however this process does not happen immediately.

QUESTION 5

Which statement is true when connecting OCI Marketplace image to shared autonomous database?

A. Compute Image and Shared ADB must be in same VCN and Subnet

B. ADB must be configured with NSG

C. ADB must be configured with Private endpoints

D. Cannot connect OCI Market image to shared ADB

Correct Answer: A
