QUESTION 3

Which two options are true when implementing security in Enterprise Planning and Budgeting Cloud (ePBCS)? (Choose two.)

- A. Users are restricted from applications by removing application/module security
- B. ePBCS roles can be assigned to members in all dimensions
- C. The member that is set to read that has a parent with write access to all descendants will result in an access level of

read

D. A user that is assigned read and write access to a member will result in write access

Correct Answer: BD

B: Assigning Access to Members To assign access to members:

D: The application checks access permissions at each level, first by user, then by group, based on the member's access permissions inheritance relationship. If multiple access permissions exist, the least restrictive access permission is applied (for example, Write access takes precedence over Read access).
