QUESTION 1

Which two statements are true about restricted party screening of parties with an agent? (Choose two.)

- A. Agent logic can be developed to perform selective screening of only certain parties.
- B. GTM automatically performs the screening of parties as soon as they are created without any agent logic.
- C. A single agent cannot listen to both creation and modification events to perform restricted party screening; separate agents must be created.
- D. The SCREEN RESTRICTED PARTIES agent action can be used to perform a sanctions screening of a party.
- E. Agent logic is required to send outbound integration messages to other applications regarding the status of party screening.

Correct Answer: AE

QUESTION 2

Which two statements are correct about product classification assignment for an Item? (Choose two.)

- A. Product Classification Notes can be added to each product classification type assigned to an item.
- B. All the product classifications assigned to an item are deleted automatically by GTM if the item is modified.
- C. If an item has multiple product classification types, then all of them are assigned to a Trade Transaction Line and there is no provision in GTM to filter the product classification types to be assigned to a Trade Transaction Line.
- D. There is a limit of up to five product classification types that can be assigned to an item.
- E. Multiple product classification types can be assigned to an Item.

Correct Answer: BC

QUESTION 3
