QUESTION 2

New: An electric utility is starting an Advanced Meter Infrastructure (AMI) roll-out for their residential customers. The initial plan is to roll out devices from their manufacturer with potentially three different device models. The customer has not decided what head-end systems they will use to communicate with these devices. Based on the customer\\'s initial roll-out strategy, the devices will have to be configured consistently to support existing tariffs for billing.

Which is a valid consideration to determine the setup of device type administrative data for this implementation?

A. billing usage rules

B. the model number

C. the device\\'s date of manufacturer

D. valid head-end systems, valid device configuration types, and the electricity service type

Correct Answer: C

QUESTION 3

How many devices can be installed at a service point at an instance in time?

A. exactly one device

B. up to three devices

C. one for each service type

D. one for each measuring component

![Pass2Lead](https://Pass2Lead.com)
Correct Answer: A
