QUESTION 1

Overnight several virtual machines have triggered alarms for guest memory usage. What are the proper steps to acknowledge the alarms while investigating the cause?

- A. Locate the relevant alarms and reset them.
- B. Notify your monitoring team to disable all virtual machine monitoring; reboot all affected virtual machines and manually monitor their memory usage for the next 60 minutes.
- C. Place all affected virtual machines into suspend until the alarms clear on their own.
- D. From the Status Bar click the alarm button; select Acknowledge the Alarm.

Correct Answer: D

QUESTION 2

What is the standard size of an ESXi boot LUN for a Vblock System 300?

- A. 5 gigabytes
- B. 15 gigabytes
- C. 20 gigabytes
- D. 50 gigabytes

Correct Answer: C

QUESTION 3

You want to quickly apply groups of settings to new or existing ESXi servers. Which vSphere feature would be used?

- A. VUM
- B. DRS
- C. vMotion
- D. host profiles

Correct Answer: D

QUESTION 4

Which steps should be performed to install PowerPathVE updates to the ESXi host through VMware Update Manager (VUM)?

- A. Enter maintenance mode, import patches, create the baseline, attach the baseline, and remediate host.
- B. Disconnect the ESXi host, import patches, create the baseline, attach the baseline, and remediate host.
- C. Import patches, create the baseline, attach the baseline, and install updates.
- D. Import patches, reboot the ESXi host, create the baseline, attach the baseline, and remediate host.

Correct Answer: A

QUESTION 5
