QUESTION 1

A vApp has been deployed with the wrong IP address information and must be updated. You have logged into the virtual machine, and updated the static IP address from the console, validating connectivity. After a system reboot, users are no longer able to connect to the system.

What is the problem?

- A. The IP configuration should take place in the vApp container.
- B. vApps require DHCP assigned addresses instead of static.
- C. The segment ID was incorrectly configured for the VXLAN.
- D. The IP configuration should take place in the vSwitch layer.

Correct Answer: A

QUESTION 2

When cloning or creating a virtual machine, storage DRS generates the fault Operation not allowed in the current state.

What will resolve this problem?

- A. Increase IO latency in the storage DRS cluster settings.
- B. Set storage DRS automation mode to manual.
- C. Increase the storage DRS utilization space.
- D. Temporarily disable affinity rules while the operation is running.

Correct Answer: D

QUESTION 3

You would like to upgrade Update Manager and keep your current database. What will allow you to meet this requirement?

- A. Upgrade the Update Manager plug-in prior to upgrading the Update Manager Server.
- B. During the upgrade process, a backup of the Update Manager database will be taken automatically.
- C. Within the Update Manager plug-in, backup the existing Update Manager database.
- D. During the upgrade process, make a backup of the existing Update Manager database.

Correct Answer: D

QUESTION 4

Which three components are part of the Vblock System Release Certification Matrix? (Choose three.)

- A. VMware vSphere hypervisor ESXi
- B. VMware vSphere Server
- C. VMware vCloud Director
- D. VMware vSphere Client
- E. VMware vCenter Operations Manager

Correct Answer: ABD

QUESTION 5

During the deployment of a Vblock System 320, the customer stresses the importance of network security and states that they would like to have a VM scan and capture all packets on the virtual switch to which it is connected.

Which security policy should you set?

- A. jumbo frame
- B. MAC address change
- C. promiscuous
- D. port scan

Correct Answer: C
