**QUESTION 1**

Which component provides flexible options for storing video and audio using a combination of network-attached storage, direct-attached storage, and SAN storage deployments?

- A. Cisco Video Surveillance Media Server
- B. Cisco Video Surveillance Virtual Matrix Software
- C. Cisco Video Surveillance Storage System
- D. Cisco Video Surveillance Transcoding and Encoding Server
- E. Cisco ISR Video Management and Storage Module

Correct Answer: C

Cisco Video Surveillance Storage System Overview As a complementary component of the Cisco Video Surveillance Media Server solution, the Cisco Video Surveillance Storage System provides flexible options for storing video and audio using cost-effective, IT-caliber storage devices. The Storage System allows the Cisco Video Surveillance Media Server's internal storage to be combined with direct attached storage (DAS) and storage area networks (SANs). As a result, video can be efficiently secured and accessed wherever it is needed, either locally or in a remote location. Video can be stored in loops, one-time archives, or event clips triggered by alarm systems to maximize storage utilization.

---

**QUESTION 2**

Threat monitoring in physical access security can be based upon which three of these? (Choose three.)

- A. doors
- B. badges
- C. age
- D. weather
- E. height
- F. fingerprints

Correct Answer: ABF

The physical access security is based on three things:

1.  
Doors
- 2.

Badges

3.

Fingerprints

It is because these are the three things which can be unique to a user and they do not change. Every other option listed here varies and cannot be measured appropriately.

---

### QUESTION 3

Which CTS software-based endpoint is an ideal solution for an executive office?

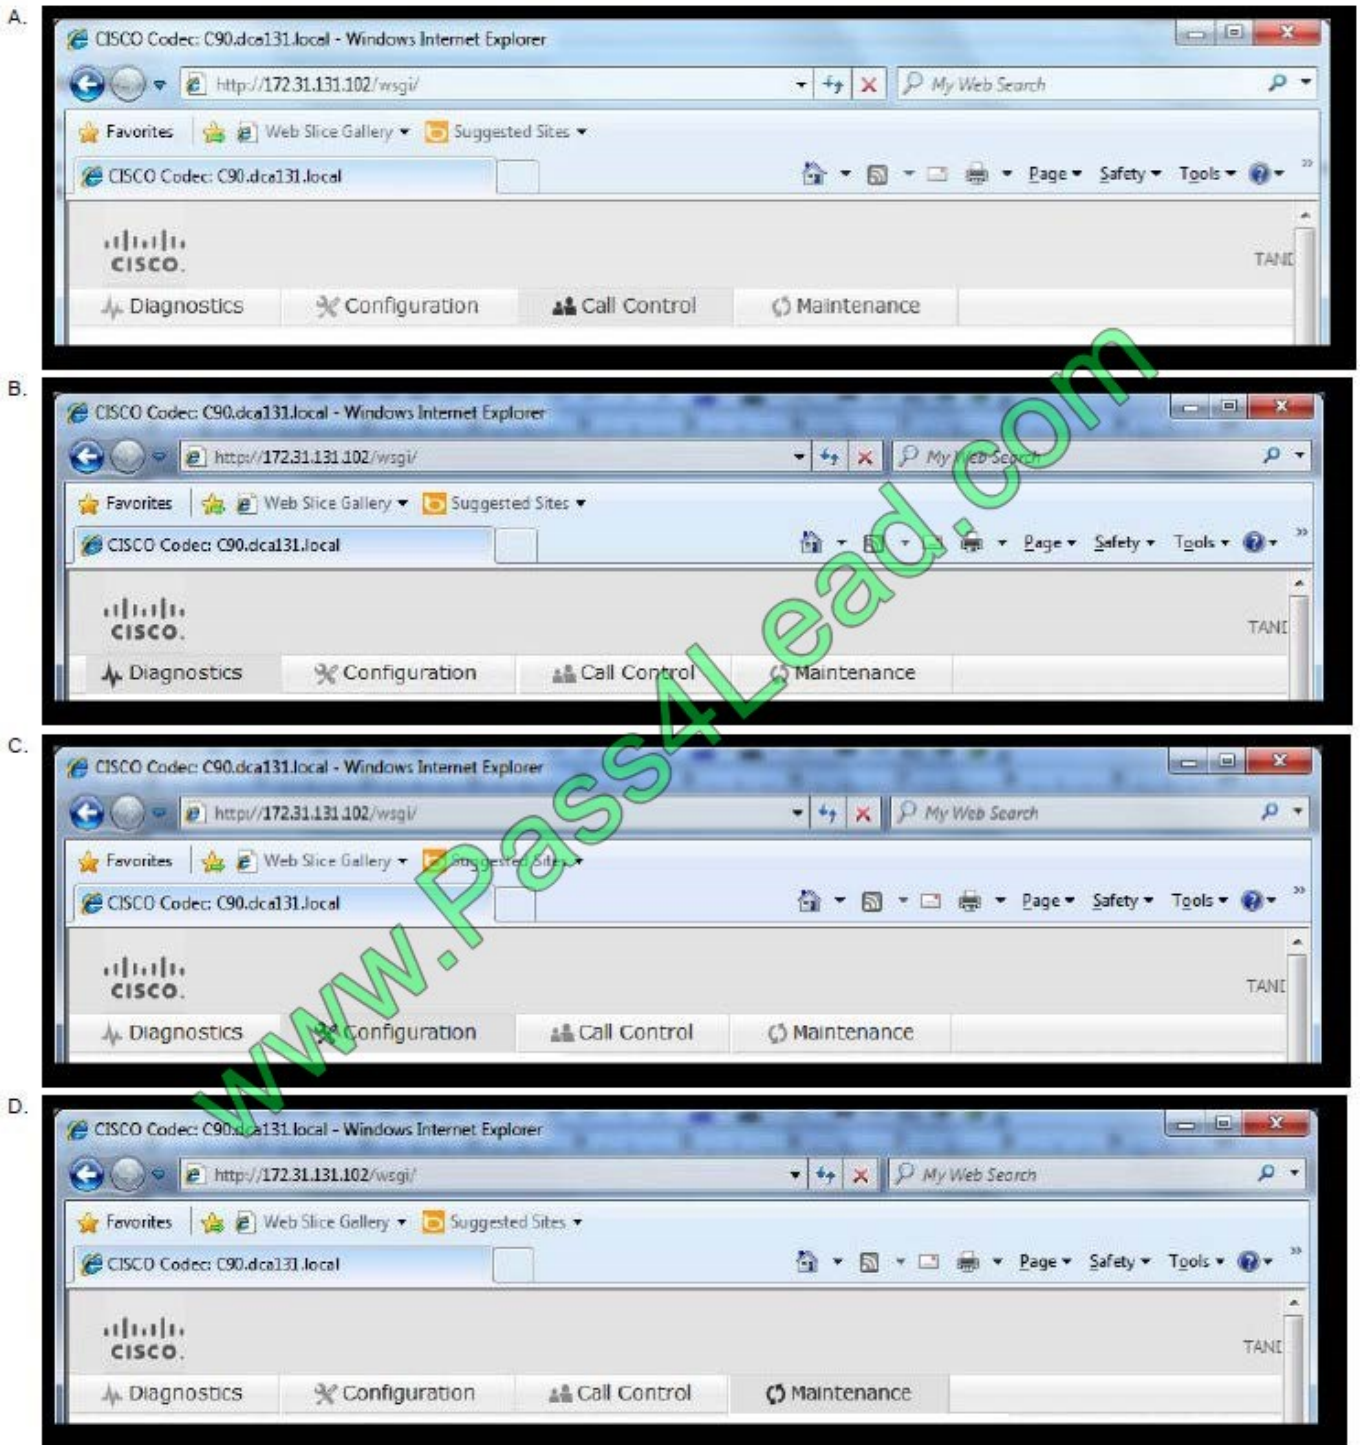

- A. DX80
- B. EX90
- C. CTS 1100
- D. CTS 500

Correct Answer: A

---

### QUESTION 4

An important Cisco TelePresence video multipoint call is in progress and you are getting complaints of pixilation of the video and poor audio quality on one of the involved systems. Which page would be a good place to start for troubleshooting the issue on the affected endpoint?

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: A

**QUESTION 5**

Which two additional items must be configured for an endpoint to register manually with the Cisco TelePresence Video Communication Server for the SIP to function correctly? (Choose two.)

- A. E.164 alias
- B. H.323 ID
- C. SIP uniform resource indicator
- D. configured SIP registrar and proxy server
- E. NTP server IPv4 address
- F. unique system ID

Correct Answer: CD

The VCS supports the SIP protocol. It acts as a SIP registrar, SIP proxy and as a SIP Presence Server.

The VCS can provide interworking between SIP and H.323, translating between the two protocols to enable end points that only support one of these protocols to call each other.

To support SIP:

SIP mode must be enabled.

At least one of the SIP transport protocols (UDP, TCP or TLS) must be active. Note that the use of UDP is not recommended for video as SIP message sizes are frequently larger than a single UDP packet.
