QUESTION 1

A network engineer wants to quickly view any issues that may exist for a newly deployed Cisco TelePresence SX20 codec. To which location in the codec web GUI should the engineer navigate to find this information?

A. Diagnostics > Alerts

B. Diagnostics > Troubleshooting

C. Configuration > System Status

D. Configuration > Security

Correct Answer: B

New troubleshooting features in TC6 A Diagnostics section on the web interface was introduced in the software version TC6.0. if there is a problem with your system you will see a notification in the Home screen when you first login to the web interface. From here you can click on Diagnostics -> Troubleshooting to see the details of the problem.

QUESTION 2

The features that Telepresence Server has and MCU don\\\'t have (Choose three)

A. Video Compositing

B. auto-attendant conference menu

C. active presence

D. multiscreen endpoint support

E. multiple layouts

F. automatic lecture mode

G. virtualization

Correct Answer: CDG

QUESTION 3

An engineer is configuring a Cisco TelePresence System endpoint for use with a maximum of six people in the room. Which table type should be configured when setting up cameras where two participants directly face the endpoint display?

A. short racetrack

B. long racetrack

C. short rectangle

D. long rectangle

Correct Answer: A

TX1310 65 with Short Racetrack Table

QUESTION 4

Which function does BFCP provide?

A. BFCP is a secondary video channel that is used for content such as slide presentations and desktop sharing.

B. BFCP is used to determine who is allowed to send media to the content channel.

C. BFCP provides the ability to pan, tilt, and zoom the far end\\'s camera.

D. BFCP negotiates who can send DTMF tones and when the tones are sent.

Correct Answer: B

Binary Floor Control Protocol (BFCP) is used for controlling access to the media resources in a meeting. BFCP allows the CTS and the remote endpoint to view presentation and main display video simultaneously with improved presentation

resolution for all third-party telepresence endpoints.

The CTS offers three media lines: one for audio, one for the main video, and the other for presentation or content using the session description protocol (SDP). Additionally, an application line is sent in the SDP for the BFCP control channel.

The bandwidth of the presentation media line matches the capability of the CTS. For example, if the CTS is capable of 30 frames per second (fps), the presentation media line bandwidth will be 4Mbps. The CTS uses BFCP over user

datagram protocol (UDP) in both secure and non-secure BFCP modes. BFCP requires a minimum CTS Release of 1.8 and a minimum Unified CM release of 8.6(2a)SU2.

QUESTION 5

A large company wants to procure video conference devices that allow multipoint conferences from C-Series and immersive endpoints that are registered to a Cisco VCS and Cisco Unified Communications Manager. Which two components meet the requirements of this company? (Choose two.)

A. Cisco TelePresence Multipoint Switch registered to Cisco VCS

B. Cisco C-Series endpoint with a multisite option key registered to Cisco VCS

C. Cisco TelePresence Server registered to Cisco VCS

D. Cisco C-Series endpoint with a multisite option key registered to Cisco Unified Communications Manager

E. Cisco TelePresence Multipoint Switch trunked to Cisco Unified Communications Manager

Correct Answer: CE
