QUESTION 1

You are configuring UCS backup operations to send data from a remote office to a central repository, but the internal firewall is preventing these jobs from succeeding.

Which three protocols must be allowed through the firewall? (Choose three)

- A. HTTP
- B. SCP
- C. FTP
- D. RSH
- E. TFTP

Correct Answer: BCE

QUESTION 2

You are working with VCE Support and are asked to send the complete support log bundle for your MDS switch.

Which statement describes what you should do?

- A. Connect to the MDS switch and run the show accounting log command.
- B. Connect to the MDS switch and run the show flogi command.
- C. Connect to the MDS switch and run the show tech-support detail command.
- D. Connect to the MDS switch and run the show zone analysis vsan command.

Correct Answer: C

QUESTION 3

A new Vblock® System 720 customer is interested in managing initiator groups and monitoring virtual provisioning.

Which element manager would you recommend?

- A. VCE Vision™ Intelligent Operations
- B. Unisphere
- C. UCSM
- D. Data Center Network Manager

Correct Answer: B

QUESTION 4

You are asked to add a new ESXi host to an existing VMware cluster. You identify an available blade with the same specifications.

Which statement is a VCE recommendation?

- A. Hosts in a VMware cluster should each belong to a different VSAN.
- B. Service profiles in a VMware cluster should be kept on as few chassis as possible.
- C. Service profiles in a VMware cluster should be spread out over as many Vblock® Systems as possible.
- D. Hosts in a VMware cluster should always belong to the same service profile template.

Correct Answer: D

QUESTION 5

You are asked to configure vMotion on a Vblock® System 340. According to VCE best practice, what is required to enable this feature?

- A. Use separate subnets for vMotion source and destination hosts.
- B. Enable jumbo frames for the vMotion network.
- C. Select a dedicated VLAN for the vMotion traffic.
- D. Use the same subnet as AMP management traffic.

Correct Answer: C
